

## **IT Specialist**

**August 2018**

### **The Company**

Logic, Inc. is a privately-owned Kansas City-based distributor of industrial automation products typically used by utilities and manufacturing. We sell and support a variety of products including programmable controllers, operator interface hardware and software, industrial computers, variable frequency drives, software used in manufacturing, and precision motion control products. Our corporate headquarters is in Olathe, KS with sales offices in Wichita, KS, St. Louis, MO, Springfield, MO and Omaha, NE.

### **The Position – IT Specialist**

This position coordinates the IT infrastructure that we use across all aspects of the business. Logic, Inc. has a wide array of both hardware and software deployed in both the business of distribution along with the sales and support of industrial automation focused software. This position also requires assisting the sales team with IT related issues involved with the sale and implementation of industrial software applications. We provide training and assistance for the IT Specialist position, but will need someone familiar and/or eager to learn the following:

- Microsoft Server products
- Exchange 2013 and Active Directory 2012R2
- External Mail Filter and Disaster Recovery
- VMware ESXi 6.0 / VCenter 5.5
- Veeam
- IIS Configuration
- Windows 10 Desktop
- Layer 3 Networking/Routing/VLANS
- SonicWALL configuration
- WiFi Management

### **Requirements**

- **Strong organizational skills** – The position requires the ability to track, accomplish, and prioritize a large number of tasks.
- **Certifications** – You will need to be Microsoft and/or VMware certified either before joining Logic, Inc. or shortly thereafter.
- **Degree** – You must have graduated from an accredited university with a degree in computer science or related field.
- **Fast Learner**– This position requires you to quickly learn to handle all the different systems that we use
- **Strong Communicator**– You will need to explain situations both verbally and written in a way that people can clearly understand.
- **Team Player**– Everyone within Logic, Inc. is working towards common goals and you will need to take proactive steps to improve our IT infrastructure to enabling our team to achieve these goals.
- **Self-Manage**– We do not micro-manage your work life; you must be able to manage time effectively, organize your material, and perform quality work without anyone looking over your shoulder.
- **Positive Attitude**– This role requires a personality that is generally positive and enjoyable. This is required for effectively interfacing with coworkers, customers, and vendors.

### **What we offer:**

- Competitive salaries with company-based profitability bonus program
- 401(k) along with a lucrative annual profit sharing plan
- Full healthcare benefits
- Collaborative work environment with your own private office – not a cubicle
- Ability to best utilize your skills in a fast-paced, small company setting
