

Special Offer to Upgrade WIN-911

Customers who are using WIN-911 Version 7 PRO/BASIC/ or SCADAAlarm will **not** be able to connect to the latest release of Wonderware 2017, 2020 **AND** it will **not** be supported in future releases of the V7 Product.

Upgrade now to take advantage of a special pricing offer for a limited time only. Promotional pricing expires June 30, 2021.

The image displays the WIN-911 software interface. At the top, there is a menu bar with 'File', 'Mode', 'Global', 'Configure', 'Tools', and 'Help'. Below the menu bar are two rows of icons: 'Global Definitions' and 'Configuration Definitions'. A large red arrow points from the 'Configuration Definitions' row towards the right. On the right side, the 'WIN-911' logo is displayed in a stylized font. Below the main interface, there are two smaller windows. The first is a 'Group Definition to Edit (1 of 4)' window showing a list of groups with columns for 'Group Name', 'Display', 'Disk', 'Printer', 'IP', 'Pop Up', and 'Sox'. The second is a 'Group Definition' window with tabs for 'Base Definition', 'Contact List', 'Contact Delays', 'Group Poke', and 'Sound'. The 'Contact List' tab is active, showing two columns: 'Available Name List (2 of 2)' and 'Selected Name List (Name 2 of 2)'. Both columns contain the name 'Tom Jones'. There are 'Add', 'Remove', 'Move Up', and 'Move Down' buttons between the columns. At the bottom of the 'Group Definition' window are 'OK', 'Cancel', and 'Help' buttons.

-  **Configure Contacts**
Start here to define the connections WIN-911 will contact and the gateways WIN-911 will use to reach the outside world.
