Summary

InTouch Access Anywhere is the world's #1 Human Machine Interface software in a browser.

InTouch goes far beyond the ordinary HMI with access to your plant data. to all roles in the industrial organization, from the boardroom to the plant floor.

• Anywhere
• Any time
• Any device
• Secure
• Zero Client Installation
• Zero Maintenance

Business Value

InTouch Access Anywhere enables users to securely achieve greater flexibility and mobility though greater visibility of the plant floor data (graphics, performance, alarms, trends) from any location.

InTouch Access Anywhere saves travel cost by allowing you to bring instantly the most suitable resource on the project from any location.

Wonderware®

InTouch Access Anywhere

Wonderware® InTouch® Access Anywhere is an InTouch extension that provides RDP access to InTouch applications via HTML5-compliant web browsers and it completes our goal of enabling visualization, collaboration and execution at all levels of the organization with zero client installation, zero maintenance and allows our customers to provide their users the ability to securely monitor and troubleshoot plant equipment from any location, on any device, at any time.

FLEXIBILITY

InTouch Access Anywhere delivers even more flexibility and usability with improved operator and engineer efficiency.

• As a web browser application, it extends the access to InTouch HMI screens and dashboards to users anywhere for improved real-time decision making
• Securely troubleshoot plant equipment from the office, home, or on the road, providing an unprecedented level of flexibility that maximizes employee output
• Always picking up where you left off, InTouch Access Anywhere remembers what screen you were on as you switch from a desktop computer to an iPad
• Ability to bring the most suitable resources instantly on a project

SECURE WEB HMI SOLUTION

InTouch Access Anywhere Server software is delivered with built-in safeguards to protect information from unauthorized access. Security features include:

• Integrated Microsoft Windows® authentication: Active Directory
• Encryption: Secure Sockets Layer (SSL)
• Firewall-friendly: The portal can be placed inside a DMZ (via a gateway)
• Portal roles: Read and read/write privileges

KEY BENEFITS

Improving the efficiency and responsiveness of your maintenance organization

You get the same rich user experience from our visualization technology as the local operator stations. This means that your most appropriate resource can address real-time issues in the plant from any location, any device and at anytime.

Make more informed decisions

While you may be on the road or away from the office, your critical business information is available on any device.

IT savings

Web-enabled access to plant floor equipment is increasingly important as you look to monitor and manage your production facilities from remote locations. With our solution, it is now easier than ever to make production adjustments using a common secure browser by accessing the world's most popular HMI's full functionality everywhere. InTouch Access Anywhere is a maintenance-free, secure web-enabled HMI application. You can access the plant floor data without any programming using one secure link.

SUPPORT AND MAINTENANCE

Server side installation: Getting started in 5 minutes

• Step 1: Download the InTouch Access Anywhere Server Software

• Step 2: Run the installer

• Step 3: Configure for use with InTouch Access Anywhere
