Industrial Communication in the IoT Era

Connecting legacy devices to IoT

Most legacy devices are isolated and unconnected; however, as the use of legacy network technologies remains prevailing in industrial automation, new solutions that connect legacy devices to modern networking systems are needed in order to extend the useful life of the existing machinery as to avoid an expansive machine purchase or major upgrade.

Moving from Closed to Open, IP-based Networks

The adoption of an open, IP-based network has gained in popularity for its ability to connect every machine, device, and equipment together on the same network either by wired or wireless technologies in order to maximize the true benefits of IoT.

Empowered Edge Computing

Bringing intelligence to where the action takes place – Edge computing is to provide computing competency to process data locally, at the edge of the network, near the source of the data. Then, reporting the processed information via a public network to the Cloud. It is an attractive technology which not only provides a faster response, but also helps relieve the workload of the Cloud, making the cost of building your IoT Infrastructure much lower.

Advantech's industrial communication solutions offer various wired and wireless communication technologies, ensuring a secure and seamless connection of every layer in the industrial communication network.

Our Technologies

Providing Interconnected Solutions for Advantech's Mission of Enabling an Intelligent Planet

In the age of Internet of Things (IoT), the trend in industrial communication for all devices, equipment, and machines to be able to connect and communicate with each other to increase productivity, efficiency, and scalability has become essential. The core mission of Advantech's iConnectivity Group is to offer the best-in-class industrial communication solutions including both wired and wireless technologies that can truly help users leverage the full potential of IoT in the most efficient and productive way.

WebAccess/NMS

Advantech's WebAccess/NMS provides centralized remote network management for industrial vertical applications.

- Auto networking topology
- Configuration backup and restore
- Network monitoring and reporting
- Dynamic connectivity indication

Network Edge

Advantech's cellular routing solutions open up endless possibilities for Internet of Things. The Advantech's cellular routers support direct communication between the MQTT-enabled devices and the Cloud and their built-in Node-RED technology enables smart data processing for a fast monitoring dashboard development in Advantech's Cloud solution, WISE/PaaS management software.

- Support for inter-operation with global 3G/LTE coverage
- Cyber security protection by firewall, NAT, and VPN
- Intelligent gateways support LoRa, Mesh network for Industrial IoT

Wired & Wireless Network Infrastructure

Advantech provides a comprehensive product portfolio to help users build a robust, secure and scalable wired or wireless networking infrastructure.

- Support various industrial Ethernet protocols, such as TCP/IP, Ethernet/IP, PROFINET, CC-link, ODVA, etc.
- Compliant with C1D2, ATEX, IECEx certifications for hazardous environments
- Cyber security protection within the network
- Layer 3 Routing Protocols: RIP, OSPF, and VRRP
- Advantech's patented IXM technology for rapid deployment, saving up to 90% of engineering time and resources

Protocol & Interface Conversion Solutions

Advantech offers numerous wired and wireless products to convert different legacy protocols and interfaces to modern networking systems to avoid a complete overhaul of existing equipment & devices, saving cost and avoiding software programming errors.

- Support various industrial Ethernet protocols including TCP/IP, Ethernet/IP, and PROFINET
- Surge protection and field isolation
- Connect to edge sensors via LoRa, MESH technologies
- Serial-to-Ethernet & USB-to-Serial Conversions

Industrial Communication

Seamless Data Connectivity from the Network Edge to the Core

Advantech leverages over 20 years of industry experience to develop industrial communication products that provide reliable wired and wireless communication solutions (LTE, Mesh, LoRa, and WLAN) for mission-critical applications. These products include industrial Ethernet switches, industrial Fieldbus gateways, wireless access points/clients, media converters, serial device servers, cellular IP gateways, and Modbus gateways that are capable of securely transmitting critical and sensitive information, remotely monitoring and controlling networked devices, and delivering advanced communication capabilities for industrial applications.

Wireless Sensing Platforms

Wzzard Mesh Platform

Wireless Mesh I/O Sensors – Intelligent Sensing Platform

- Ultra low power consumption
- Minimum 5-year lifecycle based on 1-min sensor sampling intervals
- 802.15.4e SmartMesh IP technology
- Supports MQTT and JSON IoT protocols
- UL Class 1/Division 2 hazardous locations rating
- Rugged, IP67-rated, reinforced-fiber polyester PBT enclosure*
- Ultra compact design (0.09 kg)

Wzzard LRPv

Wireless LoRa I/O Sensors – Intelligent Sensing Platform

- Low power consumption for solar and battery power applications
- Long-range, wide-area IoT gateway
- Rugged, IP67-rated, reinforced-fiber polyester PBT enclosure
- LoRa private protocol for closing system applications

Intelligent Gateway

SmartSwarm 351 Asset Integration Gateway

Seamlessly integrates data from legacy Modbus systems, devices, and sensors for industrial IoT applications

- Protocol translation and Modbus and MQTT support
- Communications and connectivity management
- Data enrichment transforms cryptic PLC data into semantically searchable content
- Event triggering and data transmissions without duplication
- Data aggregation and reporting to reduce network traffic
- Authentication and encryption features for data security

LTE Routers & Gateways

SL30x Series

SmartStart Routers & Gateways

- LTE/UMTS/HSPA+/UMTS/HSDPA/GPRS/EDGE
- Wi-Fi (optional)
- 2 x SIM card holders
- Advanced security and networking features
- Low-power mode
- UL 60950-1 certification for hazardous locations

SR30x Series

SmartFlex Routers & Gateway

- LTE/UMTS/HSPA+/UMTS/HSDPA/GPRS/EDGE
- Wi-Fi (optional); GPS receiver (wired version not included)
- 2 x SIM card holders, 1 x MicroSD card holder
- PoE PD/PSE (optional)
- Advanced security and networking features
- Low-power mode

ST35x Series

SmartMotion Routers & Gateway

- Twin interdependent cellular modules for redundant reliability
- Load balancing function
- Wi-Fi (optional); GPS receiver (wired version not included)
- 4 x SIM card holders, 1 MicroSD card holder
- PoE PD/PSE (optional)
- Advanced security and networking features
- Low-power mode

Fieldbus Gateways

EtherNet/IP **NEW**

EKI-1221EIMB

Modbus TCP to EtherNet/IP Fieldbus Gateway

- Integrated Modbus TCP and EtherNet/IP network connectivity
- Supports up to 64 connections on Modbus TCP Master mode
- Supports Modbus TCP function codes 1, 2, 3, 4, 5, 6, 15, 16, 23
- Support 32 explicit messaging and 5 implicit messaging
- Max I/O data capacity of 384 bytes in each direction

PROFINET **NEW**

EKI-1221IPNMB

Modbus TCP to PROFINET Fieldbus Gateway

- Integrated Modbus TCP and PROFINET network connectivity
- Supports Modbus TCP function codes 1, 2, 3, 4, 5, 6, 15, 16, 23
- PROFINET uplink configuration via GSDML file
- Max I/O data capacity of 384 bytes in each direction
- Supports diagnosis function

EKI-1222ECMS

Modbus RTU/TCP to EtherCAT Fieldbus Gateway

- Dual power input
- Integrate Modbus RTU/TCP and EtherCAT communication
- Designed for protocol extensibility and adaption
- Built-in real time diagnostic

EKI-1222EIMS

Modbus RTU/TCP to EtherNet/IP Fieldbus Gateway

- Dual power input
- Integrate Modbus RTU/TCP and EtherNet/IP communication
- Designed for protocol extensibility and adaption
- Built-in real time diagnostic

EKI-1222PNMS

Modbus RTU/TCP to PROFINET Fieldbus Gateway

- Dual power input
- Integrate Modbus RTU/TCP and PROFINET communication
- Designed for protocol extensibility and adaption
- Built-in real time diagnostic

Serial Device Servers

EKI-1526/EKI-1528

16/8-Port RS232/422/485 Rackmount Serial Device Server

- Connect up to 8/16-port RS-232/422/485 devices directly to TCP/IP networks
- High-speed baud rates (50 bps ~ 976.5 Kbps) for high volume transmissions
- VCOM, TCP server, TCP Client, UDP, and RFC2217 operating modes

EKI-1528-DR

8-Port RS232/422/485 DIN Rail Serial Device Server

- 2 x 10/100 Mbps Ethernet port for LAN redundancy
- VCOM, TCP server, TCP Client, UDP and RFC2217 operating modes
- I models support a wide operating temperature; CI models support isolation and wide operating temperature

EKI-1520 Series

1/2/4-Port RS232/422/485 Serial Device Server

- 2 x 10/100 Mbps Ethernet ports for LAN redundancy
- VCOM, TCP server, TCP Client, UDP and RFC2217 operating modes
- I models support a wide operating temperature; CI models support isolation and wide operating temperature

Modbus Gateway

EKI-1220 Series

1/2/4-Port Modbus Gateway

- Supports redundancy enhanced Modbus ID
- Integration of Modbus TCP and Modbus RTU/ASCII networks
- I models support a wide operating temperature; CI models support isolation and wide operating temperatures

WLAN Device Servers

EKI-1360 Series

1/2-Port RS232/422/485 to 802.11 a/b/g/n WLAN Serial/Modbus Device Server

- 2 x 10/100 Mbps Ethernet ports for LAN redundancy
- VCOM, TCP server, TCP Client, UDP and RFC2217 operating mode
- I models support a wide operating temperature; CI models support isolation and wide operating temperature
- Support dual band 2.4G/5G selective

Industrial Wireless AP/ Clients

EKI-6331AN/ 6332GN

802.11N WiFi AP/ Bridge/ Client

- Compliant with IEEE 802.11 a/n and 802.11 b/g/n
- High output power
- Fast roaming
- IP55 rated for waterproof

L3 Switches

NEW

EKI-9700/ 9600 Series

Industrial Layer 3 Managed Switch

- Static routing/NAT (EKI-9612G, EKI-9628G)
- Static routing, RIP v1/v2, OSPF v2, VRRP (EKI-9728G)
- Supports up to 4 x 10GbE fiber ports (EKI-9728G)
- Wide operating temperature

Protocol Switches

NEW

EtherNet/IP®

EKI-5500/5600-EI Series

Managed Switch with EtherNet/IP Protocol Support

- EtherNet/IP protocol
- EDS files /AOI available
- FactoryTalk® compliant Faceplate
- Dual 12 ~ 48 V_{DC} power input and P-Fail relay
- EMS level 3 protection

NEW

PROFINET®

EKI-5500/5600-PN Series

Managed Switch with PROFINET Protocol Support

- Real-time PROFINET protocol
- Media Redundancy Protocol (MRP) Master/Slave
- GSD files available
- Wide operating temperature (-40 ~ 70 °C)

Fully Managed Ethernet Switches

EKI-7428G-4CI

Industrial Rackmount Managed Switch

- IXM for rapid deployment
- Management: SNMP v1/v2c/v3, WEB, Telnet, Standard MIB
- Wide operating temperature (-40 ~ 70 °C)
- 12 ~ 48 V_{DC} dual power inputs
- EN50121-4 and NEMA TS2 certified

TAIWAN
EXCELLENCE 2016

EKI-7700 Series

Industrial Managed Switch

- Gigabit / FastEthernet ports + Gigabit Copper/SFP combo ports models available
- IXM function enables fast deployment
- IP30-rated chassis design
- EN50121-4 and NEMA TS2 certified

Unmanaged Switches

EKI-5000 Series

Unmanaged Switch

- UL C1D2, ATEX, IECEx certified
- Monitoring utility
- Port-based QoS for deterministic data transmissions
- Loop detection
- Dual power inputs

Rackmount PoE Switch

TAIWAN
EXCELLENCE 2016

EKI-7428G-4CPI

Industrial Rackmount Managed Switch with 24G PoE, 4G Combo Ports

- 24 x IEEE 802.3 af/at PoE Gigabit ports, 4 x Gigabit copper/SFP combo ports
- IXM for rapid deployment
- Management: SNMP v1/v2c/v3, WEB, Telnet, Standard MIB
- Wide operating temperature (-40 ~ 70 °C)
- EN50121-4 and NEMA TS2 certified

Fully Managed PoE Switch

TAIWAN
EXCELLENCE 2016

EKI-7700 Series

Fully Managed PoE/PoE+ Industrial Ethernet Switch

- X-Ring Pro redundancy (recovery time < 20 ms)
- IXM for rapid deployment
- Wide operating temperature (-40 ~ 75 °C)
- EN50121-4 and NEMA TS2 certified

Unmanaged PoE Switch

EKI-5000/2000 Series

Unmanaged PoE/PoE+ Industrial Ethernet Switch

- Compact size
- Redundant power design
- Wide operating temperature (-40 ~ 75 °C)
- IP30-rated chassis design
- IECEx, ATEX, CID2 certifications for hazardous environments (EKI-5000 Series)

EN50155 Rolling Stock Switches

EKI-9500 Series

M12 Managed Ethernet Switch with EN-50155 & EN-45545 Certifications

- All Gigabit connections support dual ring protection and non-blocking traffic forwarding
- M12 connector with IP67 protection
- IEEE 802.3af/802.3at per port with system PoE power Management (PoE models)
- Wide operating temperature (-40 ~ 75 °C)

IEC61850 Switch

EKI-9228 Series

Industrial Rackmount Managed Switch with IEC-61850 Certification

- 16 x Gigabit RJ-45 ports, 4 x SFP ports, 8 x Gigabit combo ports
- SFP socket for easy and flexible fiber expansion
- Gigabit X-Ring redundancy (ultra-high-speed recovery time < 20 ms), RSTP/STP (802.1w/1D), MSTP
- Dual wide-range AC/DC power input

Network Management System

WebAccess/NMS

Network Management System

- Cross-browser compatible
- Online Google Maps and offline OpenStreetMap support
- Supports all Advantech Ethernet-based products
- Automatically generated topology
- PoE, ring, wireless, cellular connection indication

Machine and Factory Automation Systems

Ethernet networking offers a reliable and open network infrastructure that allows the various systems used with today's machine and factory automation applications to communicate effectively, resulting in a highly synchronized operation. Advantech's Factory and Machine Automation products target production automation, packaging automation, and logistics & warehousing that require a compact, reliable, and robust network system. Advantech helps customers achieve high scale volume production goals and raise market competitiveness.

Control Room

Data in modern factories are transmitted through networking systems to center control rooms either for system monitoring or machine health prediction. Advantech's WebAccess/NMS is designed with SNMP and ICMP communication standards for managing all Ethernet-enabled Advantech products and third-party devices. WebAccess/NMS provides an easy-to-use platform to monitor and manage networks remotely. WebAccess/NMS enables industrial grade centralized networking management: a synthetic platform developed for remote monitoring, setting and maintaining devices via IP-based network.

Network Backbone Systems

Stable network connection is critical to modern factories as machines and devices are connected and require Ethernet to communicate. Advantech EKI-9600/9700/7700 Series (Layer 3 and Layer 2) Managed Ethernet Switches support NMS to help IT managers with networking maintenance and failure prevention. X-Ring achieves ultra high speed recovery time of less than 20 ms to ensure high network stability.

Optimized Automation Solution

EtherNet/IP and PROFINET are the leading automation communication standards that combine standard Ethernet technologies with industrial protocols to enable network convergence for IT and manufacturing control systems. Advantech's new generation protocol switches and gateways support EtherNet/IP and PROFINET protocols to communicate with EtherNet/IP and PROFINET based PLCs and also provide a FactoryTalk® View compliant faceplate for users to easily integrate with Allen-Bradley® PLCs.

Auto Guided Vehicle (AGV)

Widely used across many industries, Automated Guided Vehicles (AGV) have been darting around factory floors for decades to facilitate production. Building an AGV system requires Ethernet switches and wireless modules. The AGV system includes a small EKI-5525 5-port Fast Ethernet Switch, an EKI-1361 wireless serial device server, and an EKI-6332GN WiFi AP/Bridge/Client wireless module to communicate with the control station, while in the control site an EKI-7710E Managed switch is responsible for sending signals to EKI-6332GN devices spread throughout the site.

Industrial Fieldbus Gateway

Industrial Ethernet Switches

Machine and Factory Automation Systems

Control Room & Network Backbone Systems

Advantech's EKI-1524 serial device server connects PLC & RTU devices to EKI-7700 Series Redundant Managed Switches and EKI-9700 Series L3 Managed Switches and transmits real-time data to the SCADA system. Together they help build a robust network backbone system to ensure constant networking and eliminate downtime from broken links or points.

Why Advantech?

- Complete communication solution
- Various form factor servers fit different system requirements
- Redundant managed Ethernet switch solution with IXM fast deployment technology for better control room and network backbone systems.
- Total solution for machine and factory automation system management including WebAccess/NMS and SCADA systems

Key Products

WebAccess/NMS

WebAccess/NMS System Network Management System

- Cross-browser, cross-platform based on HTML5
- Google Maps and GPS location tracking integration
- Automatically discovers and diagrams network topology
- Support all Advantech IP-based devices & extension of 3 party devices

EKI-7700 Series

Industrial Managed Switch

- IXM function enables fast deployment
- Redundancy: X-Ring Pro (ultra high-speed recovery time < 20 ms)
- Management: SNMP v1/v2c/v3, WEB, Telnet, Standard MIB, Private MIB

EKI-9728G Series

Industrial Rackmount L3 Managed Switch

- Support 4 x 10GbE Fiber (SFP+) ports
- Support up to 12GE SFP ports
- Dynamic Routing : RIPv1/v2, OSPF, VRRP
- -40 ~ 85°C wide-range operating temperature

Optimized Automation Solution

Advantech's new generation protocol switches and Fieldbus gateways support EtherNet/IP and PROFINET protocols to communicate with EtherNet/IP and PROFINET based PLCs and also provide a FactoryTalk® View compliant faceplate for users to easily integrate with Allen-Bradley® PLCs. The IP30 compact metal housing mechanism protects against dusty industrial environments and therefore ensures continuous device connectivity while the input power range from 8.4 to 52.8 VDC is dedicated to operating in areas with unstable power and rugged environments.

Why Advantech?

- Seamless integration with Rockwell and Siemens PLCs
- Easy and fast deployment from Advantech IXM technology

Key Products

EKI-1221EIMB EKI-1221PNMB

Industrial Fieldbus Gateway Supporting PROFINET and EtherNet/IP

- The most cost-effective way for protocol conversion
- Reliable protocol extensibility to achieve interoperability
- Built-in diagnostic tool to collect data and monitor device status in real-time

EKI-5500/5600 Series

Industrial Protocol Switch Supporting PROFINET, EtherNet/IP and Modbus TCP

- Compatible with SIMATIC step 7 and TIA portal (PROFINET compatible models)
- PROFITNET models support Media Redundancy Protocol (MRP)
- Faceplate compatible with Rockwell FactoryTalk® View (EtherNet/IP compatible models)
- Easy and fast deployment from Advantech IXM technology
- Crucial management functions embedded

Auto Guided Vehicle (AGV)

EKI-5525 managed Ethernet switch allows for better control and monitoring of network status with rich EKI-6331AN wireless AP/Client providing reliable 5GHz wireless connectivity and more channels for communication with less interference. The EKI-6331AN PoE adapter also enhances flexibility in AP/Client deployment even where DC power supply is not available. Along with EKI-7710E-2C managed Ethernet switches, they help you build a solid AGV system for modern factories.

Why Advantech?

- Viewable managed switch for monitoring device connectivity status
- Fast roaming for seamless wireless connectivity
- X-Ring Pro supports rapid and predictable convergence in control site

Key Products

EKI-5525

Unmanaged Ethernet Switch

- Port-based QoS for deterministic data transmission
- 12 ~ 48 Vdc (8.4 ~ 52.8 Vdc) wide-range power input
- IEEE 802.3az Energy Efficient Ethernet (EEE) Jumbo Frame Support
- Loop detection

EKI-7710E-2C

Industrial Managed Switch

- IXM function enables fast deployment
- Redundancy: X-Ring Pro (ultra high-speed recovery time < 20 ms), RSTP/STP (802.1w/1D)
- Management: SNMP v1/v2c/v3, WEB, Telnet, Standard MIB, Private MIB
- IP30

EKI-6331AN

IEEE 802.11 a/n Wi-Fi AP/Client

- Compliant with IEEE 802.11 a/n
- IP55 waterproof certification
- MIMO 2 x 2 11n
- External RP-SMA connectors for 2T2R antennae
- High output power
- Passive 24V PoE

Railway Systems

The rapid acceptance of Ethernet-based networking in railway infrastructures provides many subtle benefits to traveler's worldwide. Industrial Ethernet backbones offer high bandwidth to enable many IP-based applications. Advantech provides stable industrial communication solutions to fulfill railway system applications in train stations, Rolling stock, and station control system applications.

Passenger Information System

Advantech WebAccess/NMS is designed with SNMP and ICMP communication standards for managing all Ethernet-enabled Advantech products and third-party devices. WebAccess/NMS can bring users an easy-to-use platform to monitor and manage networking remotely and enable industrial grade centralized networking management.

Rolling Stock Communication

Advantech's EN50155 M12 Switch fulfills a wide range of applications in moving trains as it guarantees a reliable performance under vibration and shock. For passenger information systems (PIS) this allows for connecting with LCD and LED display boards which offer travel information, news and advertisements. For in-seat video entertainment systems (VES) this offers video monitors mounted on the back of every seat. And for IP surveillance this guarantees these devices can reliably connect with cameras for a variety of applications that provide increased safety and security.

Automatic Fare Collection System

In modern railway stations, automatic fare collection (AFC) systems include ticket vending machines (TVM), ticket checking machines (TCM), and gate control systems which require switches that can ensure fast, reliable, safe, and redundant operation.

Wayside Control

To control the trains from the wayside control cabinet, there are specific controllers including CBI, TCC, RBC, and TSRS to ensure non-stop operation. Advantech industrial Ethernet switches form a dual fiber optic ring network, and each controller is connected simultaneously to these 2 fiber rings. With Advantech's X-Ring Pro technology which ensures that a backup circuit is established in just 20ms to compensate for errors such as broken links, this comprehensive redundancy concept offers maximum possible security.

Station Control Room

Transportation systems include control room systems aim at providing communication, security, surveillance, and technology for safe, convenient and comfortable travel for all commuters. Advantech's industrial communication solutions provide robust Ethernet solutions that connect devices and ensure secure data transmission to the backend system.

EKI-5000 viewable unmanaged Ethernet switches in AFC systems ensure secure data transmissions. The redundant managed EKI-7700 series switches offer PoE and non PoE models to provide continuous networking while EKI-7428G-CPI L2 managed switches serve as communication solutions in the backend system.

Why Advantech?

- Complete communication solution
- Viewable unmanaged switches allow device monitoring for secured data transmissions.

Key Products

EKI-5000 Series

Viewable Unmanaged Ethernet Switch

- Port-based QoS for deterministic data transmission
- 12 ~ 48 Vdc (8.4 ~ 52.8 Vdc) wide-range power input
- IEEE 802.3az Energy Efficient Ethernet (EEE) Jumbo Frame Support
- Loop detection

EKI-7700 Series

Industrial Managed Switch

- IXM function enables fast deployment
- Redundancy: X-Ring Pro (ultra high-speed recovery time < 20 ms)
- Management: SNMP v1/v2c/v3, WEB, Telnet, Standard MIB, Private MIB
- PoE Models for surveillance available

EKI-7428G-4CPI

Industrial 24G L2 Managed PoE Switch

- SFP socket for Easy and Flexible Fiber Expansion
- Management: SNMP v1/v2c/v3, WEB, Telnet, Standard MIB
- IXM function enables fast deployment
- Security: 802.1x (Port-Based, MD5/TLS/TTL/PEAP Encryption), HTTPS, SSH and SNMPv3
- Redundancy: Gigabit X-Ring Pro (ultra high-speed recovery time < 20 ms), RSTP/STP (802.1w/1D), MSTP

Station Control Room

Control room systems must function 24/7 without failure to deliver critical information and emergency response solutions. Advantech EKI-9728G series industrial rackmount L3 managed switches not only provide redundant networking solutions but also contain SFP sockets for easy and flexible fiber expansion to ensure secured data transmission.

Why Advantech?

- Abundant and flexible I/O ports
- Dual power inputs ensures system stability and two relay outputs for greater flexibility

Key Products

EKI-7428G-20FA

Industrial L2 Rackmount Industrial Managed Switch

- 20 x GbE SFP ports
- 100~240V AC power input
- Support X-Ring (ultra-recovery time < 20 ms)
- Support IXM (for fast deployment)

EKI-9728G

Industrial Rackmount L3 Managed Switch

- Support 4 x 10GbE Fiber (SFP+) ports
- Support up to 12GE SFP ports
- Dynamic Routing : RIPv1/v2, OSPF V2, VRRP
- Static Routing
- -40 ~ 85°C wide-range operating temperature

Rolling Stock Communication

Advantech EKI-9500 series EN50155 complied M12 Ethernet Switch fulfills guarantee reliable performance under vibration and shock in train.

Why Advantech?

- M12 connector with IP67 protection
- Certified with EN50155 and compliant with EN45545-2
- X-Ring Pro supports rapid and predictable convergence
- LAN Bypass will assure continuous system operation when Ethernet Switch fails

Key Products

EKI-9512/P/9516/P

EN-50155 M12 Managed Ethernet Switch

- Certified with EN50155 and compliant with EN45545-2
- Redundancy: X-Ring Pro (ultra high-speed recovery time < 20 ms)
- M12 connector with IP67 protection
- IEEE 802.3af/802.3at per port with system PoE power management (PoE models)
- Two-pair LAN-Bypass ports

Wayside Control

In a wayside control system, Advantech EKI-7000 series managed Ethernet switch provides an easy way to establish a redundant network with a recovery time of less than 20ms to ensure continuous networking, which is critical in transportation systems.

Why Advantech?

- Complete communication solution
- Various form factors to fit different system requirements

Key Products

EKI-7700 Series

Industrial Managed Switch

- IXM function enables fast deployment
- Redundancy: X-Ring Pro (ultra high-speed recovery time < 20 ms)
- Management: SNMP v1/v2c/v3, WEB, Telnet, Standard MIB, Private MIB
- Certified with EN50121-4

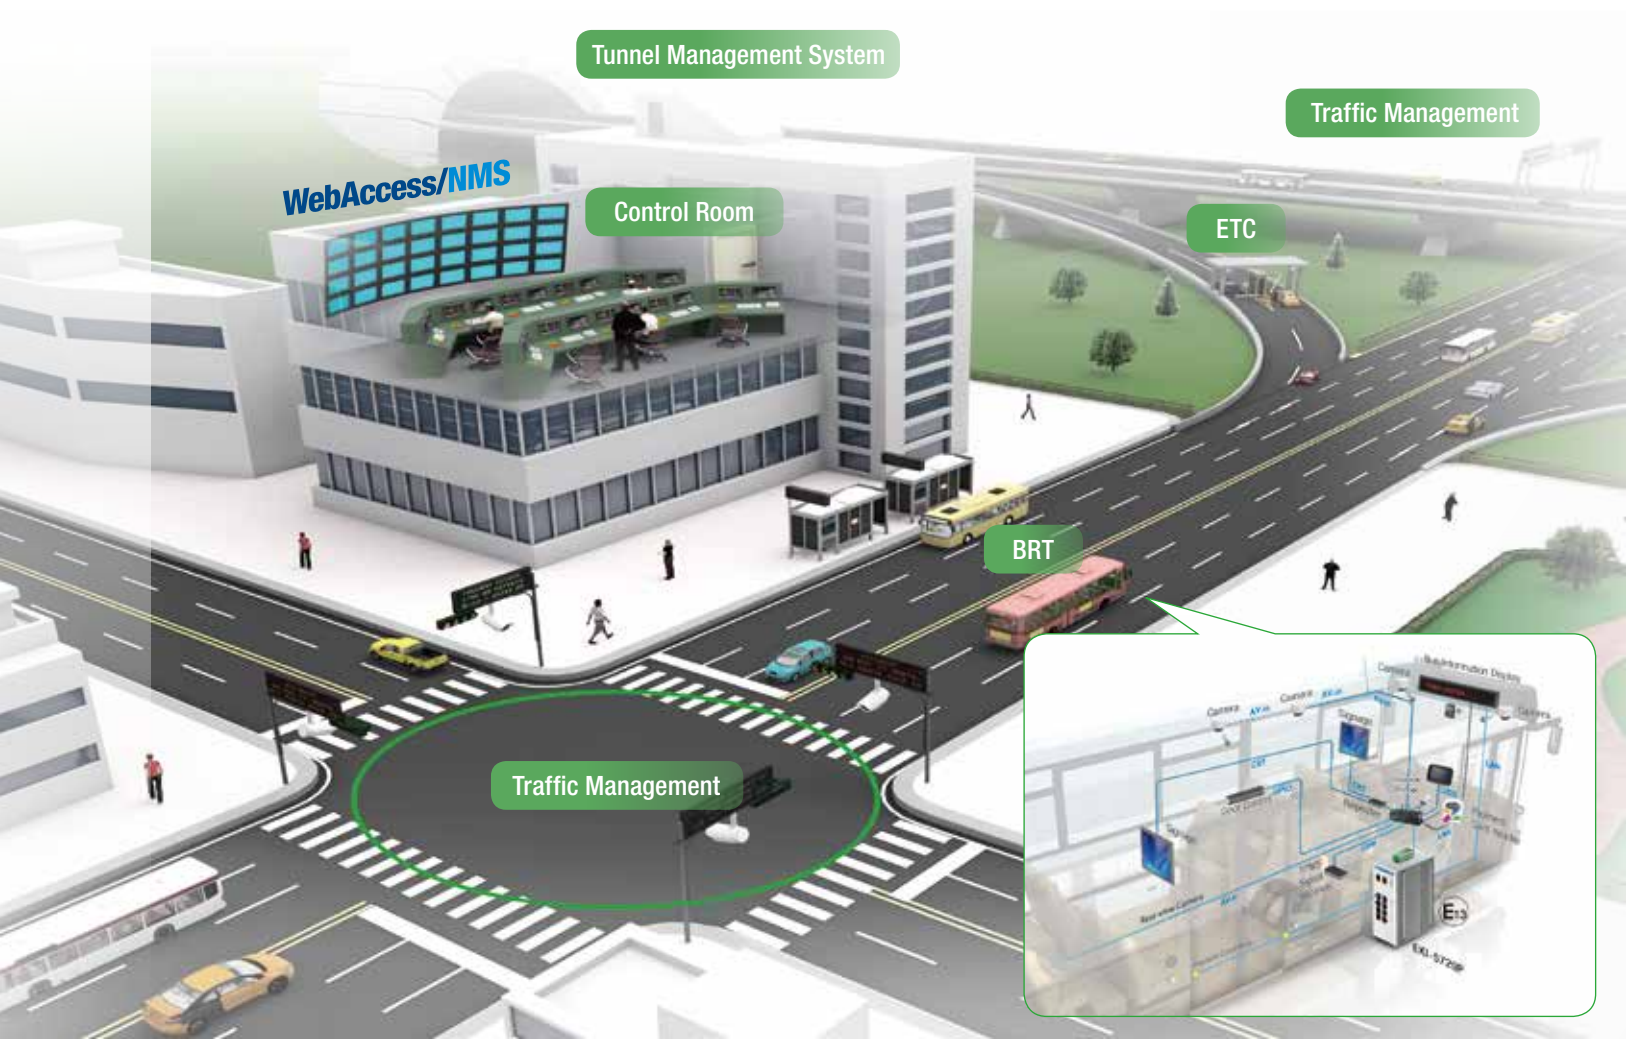

EKI-7428G-4CPI

Industrial Rackmount Managed PoE Switch

- 24 x IEEE 802.3 af/at PoE Gigabit ports + 4 x Gigabit Copper/SFP combo ports
- IXM for Fast Deployment
- Management: SNMP v1/v2c/v3, WEB, Telnet, Standard MIB
- -40 ~ 70°C wide-range operating temperature

Intelligent Transportation Systems

Intelligent Transportation Systems (ITS) aim at providing communications and technology that allow safe, convenient, comfortable, efficient, and environmentally friendly travel for all commuters. Many cities worldwide are in the midst of improving their transportation system infrastructures, and Advantech is there to provide a helping hand, offering advanced product solutions for the freeway market segment, including freeway entrance controls, traffic information systems, tunnel monitoring systems, electronic toll collection systems, vehicle count & classification, and IP surveillance.

Control Room

Transportation systems include control room systems aim at providing communication, security, surveillance, and technology for safe, convenient and comfortable travel for all commuters. Many cities worldwide are in the midst of improving their control room systems, and Advantech is there to provide a helping hand, offering advanced industrial communication product solutions with flexible and high-performance, trusted monitoring system WebAccess/NMS to make ideal solutions for system integrators.

Tunnel Management System

Distributed network control architectures are used for Tunnel Management Systems to provide traffic guidance, CCTV, fire alarm, and ventilating systems while collecting several sensor data, such as vehicle detectors, COVI, visibility, and wind sensors. Compact and high performance Ethernet switches provide redundant network connections.

City Traffic Management

Advantech offers total solutions for Real-time Traffic Information Display Systems to accommodate difference needs. We offer Ethernet switches, serial device servers, and controllers. The system quickly and reliably sends urban traffic information to the control center for real-time city traffic management.

Bus Rapid Transit (BRT)

A mobile onboard computing and back-office communications system is applied in a Bus Rapid Transit (BRT) system application. This not only offers a rapid, punctual, secure and convenient service to passengers, but it also improves the operational efficiency for fleet management via real-time communication. Advantech's eMark certified in-vehicle solutions ensure the realization of the BRT system. eMark certified EKI-5000 Series are used to ensure the BRT provides secure data transmission for signage displays to deliver instant information to passengers and for the surveillance cameras to enhance security by recording interior views of the passenger compartment.

Electronic Toll Collection (ETC)

In the evolution from manual to electronic toll collection, an intelligent and high performance system was required to decrease workforce requirements as well as assuring traffic flows on the highway. Its inherent robustness assures stable roadside functionality. Our communication solutions ensure nonstop data transmission and play a critical role in the system. The compact size, industrial grade mechanism design makes Advantech's communication products offered the best connectivity solution for this electronic toll collection application.

Control Room

Advantech EKI-9728G Industrial Rackmount L3 Managed Switch provides static and dynamic routing to connect data transmitted from the roadside to the control room and provide real time status updates and monitoring to ensure efficiency and safety.

WebAccess/NMS

Key Products

EKI-9728G

Industrial Rackmount L3 Managed Switch

- Static Routing
- Dynamic routing: VRRP, OSPF, RIP V1/V2
- Management: SNMP v1/v2c/v3, WEB, Telnet, Standar MIB Security: 802.1x (Port-Based, MD5/TLS/TTLS/ PEAP Encryption), HTTPS, SSH and SNMPv3
- Dual power input and 2 relay output

WebAccess/NMS

WebAccess/NMS System

Network Management System

- Cross-browser, cross-platform based on HTML5
- Google Maps and GPS location tracking integration
- Automatically discovers and diagrams network topology
- Support all Advantech IP-based devices & extension of 3 party devices

Bus Rapid Transit (BRT)

Advantech EKI-5729P/PI and EKI-5624P/PI from the Viewable Unmanaged Ethernet Switch series are eMark certified and designed for in-vehicle applications and surveillance. These switches are classified as power source equipment (PSE) and come with the port-based QoS for deterministic data transmissions that allow the priority ports to prioritize the traffic coming over those ports and redirect the less immediately necessary data over the remaining ports.

Why Advantech?

- eMark certified Ethernet Switch solution
- Remote control PoE function by SNMP

Key Products

EKI-5729P/PI, EKI-5624P/PI

Unmanaged PoE Switch

- EMS level 3 protection for extreme outdoor environments
- Port-based QoS for deterministic data transmission
- Jumbo Frame Support (Up to 9,216 Bytes)
- e-Mark certified for in-vehicle application

Tunnel Management System

Advantech EKI-7700 series Redundant Managed Ethernet Switches allow for continuous network operation, while EKI-1520 series serial device servers connect serial devices together for redundant networking solutions. The IXM technology embedded in EKI-7700 series allows for device fast deployment which reduces 90% of the time for device setting and maintenance.

Why Advantech?

- Advantech total solution for industrial communication layer
- Redundant Managed Ethernet Switch solution allows for better control room and network backbone systems
- EKI-7700 series with IXM fast deployment technology for better efficiency
- Wide operation temperature

Key Products

EKI-7710E-2CPI

Industrial Managed PoE Switch

- IXM function enables fast deployment
- Redundancy: X-Ring Pro (ultra high-speed recovery time < 20 ms)
- Management: SNMP v1/v2c/v3, WEB, Telnet, Standard MIB, Private MIB
- EN50121-4, NEMA-TS2 certified
- Support PoE/PoE+

EKI-1524 Series

RS-232/422/485 Device Server

- Provides 10/100 Mbps Ethernet ports for LAN redundancy
- Provides COM port redirection (Virtual COM), TCP and UDP operation modes
- Built-in 15 KV ESD protection for all serial signals
- Wide temperature

City Traffic Management System

Advantech EKI-7700 series Redundant Managed PoE Ethernet Switches with X-Ring technology offer less than 20ms recovery time to ensure always an connected network for either surveillance or car speed monitoring systems to provide better and safer city traffic information sharing.

Why Advantech?

- Complete communication solution
- Redundant Managed Ethernet Switch solution with IXM fast deployment technology for better control room and network backbone systems.
- Wide operation temperature

Key Products

EKI-7712E Series

Gigabit Managed Redundant Industrial Switch

- IXM function enables fast deployment
- SFP socket for Easy and Flexible Fiber Expansion
- Redundancy: X-Ring Pro (ultra high-speed recovery time < 20 ms)
- Management: SNMP v1/v2c/v3, WEB, Telnet, Standard MIB, Private MIB
- EN50121-4, NEMA-TS2 certified

Electronic Toll Collection (ETC)

EKI-7710G-2CPI series Redundant Managed PoE Switches provide high bandwidth real-time data transmission for surveillance systems that require real time and high resolution image transmission and, offers less than 20ms recovery time to ensure a 24/7/365 continuous robust networking solution.

Why Advantech?

- Redundant Managed Gigabit Power over Ethernet (PoE) solutions offer high resolution image transmission with extra redundancy
- EKI-7700 series with embedded IXM fast deployment technology allows efficient device setting and maintenance.
- Wide operation temperature

Key Products

EKI-7710G-2CPI

Industrial Managed PoE Switch

- IXM function enables fast deployment
- Redundancy: X-Ring Pro (ultra high-speed recovery time < 20 ms)
- Management: SNMP v1/v2c/v3, WEB, Telnet, Standard MIB, Private MIB
- EN50121-4, NEMA-TS2 certified
- Support PoE/PoE+

Smart Grids and Oil & Gas

Advantech provides Industrial communication solutions to build automated systems for the real-time central monitoring of a variety of field data acquired from remote locations including wind farms, solar farms, and oil wells. Gateway solutions are used to acquire a variety of field data, while wireless solutions are used to solve the issue of complex wiring problems. Large amounts of information is processed in cloud servers, and industrial grade switches with required certifications provide continuous data transmission. Finally, SCADA software presents real-time monitoring information, failure alarms and customized reports to effectively develop maximum operational efficiency of wind farms and photovoltaic power stations.

Oil and Gas

Wind Power Transmission System

Wind power plants require many information management systems and remote wind turbine monitoring systems. Wind power is often used in harsh environments with high day/night temperature differences and serious dust and/or sand exposure. The rugged electromagnetic environment of the motor control systems requires an industrial switch with excellent anti electromagnetic interference capability and long MTBF. In order to enhance communication reliability, the operator has to set up a redundant ring with short failover time. When any error occurs in the communication network, the switch should smoothly switch to the redundant backup line. Fiber optic managed switches with wide temperature operating ranges help provide a reliable X-Ring Pro networking topology to ensure uninterrupted data transmission.

Solar Power Transmission System

To harness the sun's power, many countries have been investing in solar technologies for over 30 years. Today's solar power systems include reflectors, mirrors, heat insulating absorbers, motion control technologies, and data transmission systems. Advantech's industrial LTE/3G Cellular Routers are a perfect fit for wireless data transmission systems due to their great performance, reliability and ruggedness. LTE/3G Cellular Routers collect data from solar panels and inverter, pyranometer, and relative sensors. This information is then transmitted through cellular data networks to the control center to easily access real-time information. LTE/3G Cellular Routers provide dual SIM slots for redundancy and one SD slot for storage expansion.

Hazardous Location Monitoring System in Oil & Gas

Wells and pumping stations are located in remote and hazardous environments where wide temperatures, pressure, and vibration are normal and high security is required to protect valuable equipment and prevent accidents. Advantech's Industrial Communication Solution includes cellular routers, Ethernet switches (ATEX/C1D2 certified) and serial device servers which are designed to build robust communication solutions to connect central control rooms with remote devices to ensure continuous data transmission for hazardous location monitoring and maintenance.

Smart Grids and Oil & Gas

Wind Power

Advantech industrial grade Ethernet Switches provide rugged communication solutions for harsh environments such as wind farms in contact with high/low, day/night temperature fluctuations and extreme dust/sand exposure. EKI-7712E-4FI Redundant Managed Ethernet Switch with redundant ring smoothly switches to the redundant backup line if connection failures occur. Moreover, the IXM embedded function allows for fast deployment which dramatically saves engineers time and cost. The overall solution also includes EKI-2741F Fiber Optic Industrial Media Converter and EKI-7428G Rackmount L2 Managed Switch, which provides redundant networking with excellent anti-electromagnetic interference capability and long MTBF to ensure smooth transmission rates.

Key Products

EKI-7428G-4CPI

Industrial 24G L2 Managed PoE Switch

- SFP socket for Easy and Flexible Fiber Expansion
- Management: SNMP v1/v2c/v3, WEB, Telnet, Standard MIB
- IXM function enables fast deployment
- Security: 802.1x (Port-Based, MD5/TLS/TTL/PEAP Encryption), HTTPS, SSH and SNMPv3
- Redundancy: Gigabit X-Ring Pro (ultra high-speed recovery time < 20 ms), RSTP/STP (802.1w/1D), MSTP

EKI-2741F

Fiber Optic Gigabit Industrial Media Converters

- 1000 Mbps Ethernet port with RJ45 connector
- Supports MDI/MDI-X auto crossover
- Provides Link Fault Pass-through (LFP)
- Jumbo Frame: 9K bytes

EKI-7712E-4FI Series

Gigabit Managed Redundant Industrial Switch

- IXM function enables fast deployment
- SFP socket for Easy and Flexible Fiber Expansion
- Redundancy: X-Ring Pro (ultra high-speed recovery time < 20 ms)
- Management: SNMP v1/v2c/v3, WEB, Telnet, Standard MIB, Private MIB

Oil and Gas

Wired and Wireless Communication Solution for Oil Platforms

To ensure continuous remote monitoring of drilling platforms, the communication infrastructure needs to be robust and redundant due to the severe hazards and challenges present in oil platforms. Advantech EKI-7710G-2CPI Managed PoE Switch provides a stable communication solution for extreme temperature operation, while its high bandwidth enables high quality data, voice, and video transmission. Combined with EKI-6330 series WiFi solutions and EKI-1331 Gateway, they provide a robust industrial grade communication solution for oil platforms.

Why Advantech?

- Wide temperature models allow for stable communication in extreme temperatures
- High bandwidth Ethernet Switch solutions for high quality data, voice, and video transmission
- Redundancy prevents data loss from network connection failures
- Complete communication solutions to provide solid networking

Key Products

EKI-7710G-2CPI

Industrial Managed PoE Switch

- IXM function enables fast deployment
- Redundancy: X-Ring Pro (ultra high-speed recovery time < 20 ms)
- Management: SNMP v1/v2c/v3, WEB, Telnet, Standard MIB, Private MIB

EKI-6331AN

IEEE 802.11 a/n Wi-Fi AP/Client

- IP55 waterproof certification
- MIMO 2 x 2 11n
- High output power
- Passive 24V PoE

EKI-5000 Series

Unmanaged Switch

- UL C1D2, ATEX, IECEx certified
- Monitoring utility
- Port-based QoS for deterministic data transmissions
- Loop detection
- Dual power inputs

EKI-1524 Series

RS-232/422/485 Device Server

- COM port redirection (Virtual COM), TCP and UDP operation modes
- Built-in 15 KV ESD protection for all serial signals
- Supports line to line 4 KV, line to ground 8 KV
- Provides isolation and wide operating temperature

EKI-1331

Serial to 3G Industrial Gateway

- Universal five-band UMTS/HSPA+850/900/1800/1900/2100 MHz
- Protocols converting between serial and Ethernet: Modbus RTU & TCP
- Provides NAT and VPN
- EMC Level III for industrial standards

Solar Farm

Advantech SmartFlex cellular routers offer abundant connection options to the cellular network including Serial Ports, Modbus, WiFi, and Ethernet devices for reliable connection in remote areas. The dual SIM slots support LTE signal redundancy and switch to an available channel automatically while disconnecting the current channel. Additional modules provide a flexible SW architecture environment for creating various customized applications.

Why Advantech?

- Wide range power input from 10 to 60 VDC, 2 KV EFT/Surge protection to prevent damage from various types of power resources
- 2 KV serial line protection
- Dual SIM slots support LTE signal redundancy and switch to an available channel automatically

Key Products

SmartFlex

LTE Industrial Router

- LTE/3G(800 / 900 / 1800 / 2100 / 2600 MHz)
- Dual SIM for telecom redundancy
- Wide range DC input(10-60VDC) and wide range operating temperature (-40 to +75 °C)
- Connect Ethernet and Serial Devices over VPN
- Various interface: serial ports, Modbus, I/O, WiFi, GPS, USB, SD card slot, and Ethernet

EKI-1224CI

Modbus Gateway with Isolation and Wide Temperature

- 2 x 10/100 Mbps Ethernet ports for LAN redundancy
- Integration of Modbus TCP and Modbus RTU/ASCII networks
- Surge protection for D.C. power ports with line to line 2 KV, and line to earth 4 KV; for signal ports with 4 KV
- Support isolation and wide operating temperature

EKI-1361

WLAN Serial Device Server

- Links any serial device to an IEEE 802.11 a/b/g/n network
- Provides 1/2 x RS-232/422/485 port
- Secures data access with WEP, WPA, and WPA2
- Supports WLAN Ad-hoc and infrastructure modes
- Support Dual band 2.4G/5G selective

EKI-6332GN

802.11N WiFi AP/Bridge/Client

- Compliant with IEEE 802.11 a/n and 802.11 b/g/n
- High output power
- Fast roaming
- IP55 waterproof

Wireless Solutions for Oil Well Pump Trucks

Pump trucks with WiFi solve the problem of oil and gas wells that are located far from existing Ethernet networks. Advantech EKI-6330 series WiFi AP/Bridge/Client are simple to deploy and easy to adapt. They can be installed on pump trucks and in mobile control centers to achieve excellent communication and allow nearby laptops and wireless devices to connect to the same network.

Why Advantech?

- High flexibility WiFi devices allow for user friendly device deployment

Key Products

EKI-6331AN

IEEE 802.11 a/n Wi-Fi AP/Client

- IP55 waterproof certification
- MIMO 2 x 2 11n
- High output power
- Passive 24V PoE

Environment and Facility Management Systems

Advantech has an excellent reputation for developing Environmental and Facility Management Systems (EMS). While Environmental Monitoring applications focus on air, water, river, dam and electric applications, Facility Management targets factory and remote SCADA applications. Advantech's air quality monitoring systems, hazardous location monitoring systems, and waste water treatment management systems provide value-added systems and solutions, allowing users to monitor and operate processes anytime anywhere.

Water and Wastewater Treatment

Proper water treatment is a very important endeavor for all industrial and public enterprises. Water treatment produces organic and mineral sludge from filtration and sedimentation. Therefore, it is important to centralize the measurement of water consumption, collect all the information on the status of the water, and remotely control the water flow level in each node (branch). Advantech offers complete water and waste water treatment monitoring and control systems for treating water to obtain very high quality water.

Disaster Prevention

Data needed for disaster prevention is collected from remote locations ; therefore, product stability and remote firmware upgrade functions are crucial to reduce manpower on maintenance. Advantech's robust communication solutions including Network Management System, Industrial Router, Media Converter, and Managed Ethernet Switches provide a complete communication solution for real time monitoring of dams and rivers to prevent disasters.

Hazardous Location Monitoring System

In chemical and petrochemical plants with hazardous areas, high security is required to protect valuable equipment and prevent accidents. Advantech's ATEX/C1D2 certified Industrial Communication Solution includes cellular routers, Ethernet switches and serial device servers which are designed for hazardous locations and provide reliable and robust communication connection.

Disaster Prevention

Disaster prevention service providers need to collect various kinds of data from remote locations. This data often comes from different devices using different formats and protocols. The fact that this data often takes a long time to process before it is usable reduces the time available for the development of the GIS. To overcome the incompatibilities of different data formats, service providers should offer a total data acquisition solution that can store the data in a database that the GIS can use. Another drawback is that current systems do not support remote management. Therefore, when system settings need to be changed or a firmware upgrade must be performed, personnel have to be dispatched to the site in order to carry out their tasks.

Key Products

EKI-7428G-4CPI

24G+4G Combo port L2 Rackmount Managed Switch

- SFP socket for Easy and Flexible Fiber Expansion
- Redundancy: Gigabit X-Ring Pro (ultra high-speed recovery time < 20 ms), RSTP/STP (802.1w/1D), MSTP
- 48VDC power input (46-57 VDC for POE af , 53 -57 VDC is recommended for at) and 2 relay output
- -40 ~ 70°C wide-range operating temperature

EKI-7710E-2CI

Gigabit Managed Redundant Industrial Switch

- IXM function enables fast deployment
- SFP socket for Easy and Flexible Fiber Expansion
- Redundancy: X-Ring Pro (ultra high-speed recovery time < 20 ms)
- Management: SNMP v1/v2c/v3, WEB, Telnet, Standard MIB, Private MIB

Hazardous Location Monitoring System

In hazardous areas, high security is required to protect valuable equipment and prevent accidents. Advantech's EKI-1220 series Modbus Gateway connects PLCs while EKI-1520 Series Serial Device Server connects analog devices including temperature sensors, vibration sensors, alarms and PIR sensors, and send back all the data to the control center through EKI-7700 series redundant Managed Ethernet Switch. The networking solution includes Ethernet switches, Modbus gateways, and device servers that are UL, Class 1 Division 2 certified for hazardous locations.

Why Advantech?

- Dual DC power input from 12 to 48 VDC and 2 KV EFT/Surge protection to prevent damage from various power sources
- Dual SIM slots support GPRS signal redundancy which switch channels automatically
- C1D2 certified
- Operating under wide temperature

Key Products

EKI-5000 Series

Viewable Unmanaged Ethernet Switch

- Port-based QoS for deterministic data transmission
- 12 ~ 48 Vdc (8.4 ~ 52.8 Vdc) wide-range power input
- IEEE 802.3az Energy Efficient Ethernet (EEE) Jumbo Frame Support
- Loop detection

EKI-1220 Series

Modbus Gateway

- Integration of Modbus TCP and Modbus RTU/ASCII networks
- Auto searching slave ID over configuration utility
- Built-in 15 KV ESD protection for all serial signals
- Automatic RS-485 data flow control

EKI-1524CI

RS-422/485 Serial Device Server

- COM port redirection (Virtual COM), TCP and UDP operation modes
- Built-in 15 KV ESD protection for all serial signals
- Supports line to line 4 KV, line to ground 8 KV
- Provides isolation and wide operating temperature

EKI-7712E-4FI Series

Gigabit Managed Redundant Industrial Switch

- IXM function enables fast deployment
- SFP socket for Easy and Flexible Fiber Expansion
- Redundancy: X-Ring Pro (Recovery time < 20 ms)

Water Treatment Management System

Advantech EKI-7712E-4F/4FI and EKI-7720E-4F/4FI Gigabit Managed Redundant Industrial Switches with IXM fast deployment technology not only allow for redundant Ethernet connection but also provide efficient device configuration and deployment. In addition, the switch offers excellent reliability with X-Ring Pro to avoid network down times of less than 20ms.

Why Advantech?

- Selection of Redundant Managed Ethernet Switches to fulfill different applications
- IXM technology allows for easier deployment and configuration and improves the efficiency of device operation in remote areas

Key Products

EKI-7712E-4FI Series

Gigabit Managed Redundant Industrial Switch

- IXM function enables fast deployment
- SFP socket for Easy and Flexible Fiber Expansion
- Redundancy: X-Ring Pro (Recovery time < 20 ms)

Surveillance System

Parking Lot Surveillance

To deter theft, vandalism, and other criminal activities in the parking lots, video surveillance systems play an important role in securing the safety of the parking areas. Advantech's EKI-7700 Industrial Managed Switch Series and PoE+ Giga-MiniMc LFPT Media Converters, both complying with 802.3af-2003 (15W) and IEEE 802.3at-2009 (30W, PoE+) standards provide a reliable PoE function to ensure sufficient power supply in remote areas. Along with EKI-6330 AP Series, they ensure an uninterrupted data transmission from on-site equipment to the central control location. In addition, due to the compact and lightweight design of Giga-MiniMc LFPT Media Converters, it is no doubt the best choice when the installation space is limited.

Why Advantech?

- Advantech EKI-7700 Series support PoE function to eliminate the need to run dedicated power lines out to the camera/PD location
- Compact-sized Advantech B+B PoE+ Giga-MiniMc LFPT media converters include two 10/100/1000 Mbps Power-over-Ethernet (PoE) copper ports and an SFP (Small Form Pluggable) fiber port
- Advantech EKI-6330 AP Series are designed to avoid cross-talk, interference or corruption of the data streams to ensure seamless data transmission

Road Surveillance

Advantech's EKI-7000 Industrial Managed Switch Series are designed to support video streaming quality of service (QoS), Internet Group Management Protocol (IGMP), Virtual LAN (VLAN), rapid redundant function and extreme temperature environment to ensure an always-connected network for a better and safer traffic surveillance solution. In addition, Advantech's WebAccess/NMS, a trusted monitoring system further helps users to remotely access, monitor, and control the individual components of a network within a larger management framework, making it an ideal solution for road surveillance systems.

Why Advantech?

- Advantech EKI-7700 Series support PoE, QoS, IGMP, VLAN and X-Ring function to ensure an always-connected network for a better and safer traffic surveillance solution.
- A network management system (NMS) is a software utility to allow users to monitor the individual components of a network within a larger network management framework.
