

## Notice to owners of AIBO ERS-7 model equipped with AIBO MIND 2 software only.

Service Pack 2 for AIBO®MIND 2 software is now available. Before installing Service Pack 2, please use AIBO Custom Manager 2 to ensure that installation is required as Service Pack 2 may be pre-installed.

### Service Pack 2 offers the following improvements:

- 1) **Babyhood stage freeze** : In some instances, AIBO could stop responding to your actions during babyhood stage especially in the mimic mode. This has been resolved with Service Pack 2 for AIBO MIND 2.
- 2) **AIBO Eyes improvements**:
  - a. Previously, depending on the emails in the mail server (POP), AIBO could reply to messages not intended for your AIBO with an error message. This has been resolved.
  - b. Connection status display: if the connection fails, error messages from the POP/SMTP server can now be displayed on the connection check page of your web browser.

**Please note: AIBO MIND 2 Service Pack 2 is only compatible with AIBO MIND 2 software.**

Service Pack 2 is offered as an AIBO® Custom Data (ACD) from this website. With PC-based software "AIBO® Custom Manager 2" (freely available at the same time and place), you can install Service Pack 2 on your AIBO® MIND 2 Memory Stick.

Applying Service Pack 2 will not affect ERS-7's data on its AIBO® MIND 2 Memory Stick, for example: growth data, etc. Installation of AIBO MIND 2 Service Pack 1 is not necessary.

Thank you.
