## AIBO ERS-7 Illume-Face expressions

This pdf.document enables you to better understand what AIBO is expressing - **in Mind 2** - through its face lights. AIBO uses its Illume-Face to communicate with you throughout the day, e.g. when AIBO detects its toys, someone's hand, voice commands or your face and voice. Each expression appears as an animated pattern on the Illume-Face display, created by LEDs that light up or fade out to varying degrees.

Click on one of the 8 subcategories to find out what AIBO is expressing exactly.

**1. AIBO's six basic expressions**

**5. Alarm clock indicator**

**2. AIBO's general Illume face expressions**

**6. Battery level indicator**

**3. AIBO's favourites**

**7. AIBO's modes**

**4. Energy station search for self-charge**

**8. Emergency situations**

**Remark:** this document contains only a selection of Illume-Face expressions. Not all expressions are included.

## 2. AIBO's general Illume-Face expressions

Using its eyes, AIBO is able to communicate a whole lot more than its basic moods. For example, AIBO can tell you when it sees its AIBOne, its pink ball or your face. Please click on one of these twelve expressions in order to find out what they are telling you.

Click on one of the small images below and you will see an enlarged version on the right.

## 4. Energy Station search for self-charge

AIBO knows when its batteries are low and immediately looks for its Energy Station to recharge them. At all stages of the process AIBO will communicate with you: when it starts looking for the Energy Station, when it has found it, when it cannot find it or when it gives up searching for it.

AIBO is looking for the Energy Station (flashing slowly)

AIBO found the Energy Station pole/marker (flashing slowly)

AIBO successfully self-charged (flashes once)

### Potential problems:

AIBO lost track of the Energy Station marker.

AIBO has given up searching for the Energy Station! (flashes once)

## 5. Alarm clock indicator

When sitting on its Energy Station, AIBO can sound a chime and make a movement to signal the hour and half hour (please see the user guide for setup instructions). The hourly alert chime is accompanied by an Illume-Face expression. The number of times the expression flashes is determined by the time. For example, at 3:00:00 pm the expression will flash three times; at 6:00:00 pm the expression will flash six times. Discover the full set of 'hourly alert' Illume-Face expressions by clicking below.
