STEP 3
Setup to Watch Video On the Go (See the other side.)
- Make easy setup settings for the Base Station with your PSP™ system.

Setup Is Completed   Watch video on your PSP™ system at home and on the go.

STEP 1

## Prepare the PSP™ System and the Base Station

Check the version of your PSP™ system software

To check the version of your PSP™ system software, select "System Settings" under 🧰 from the home menu, and then select "System Information". If your system software version is not 2.70 or higher, perform the update.
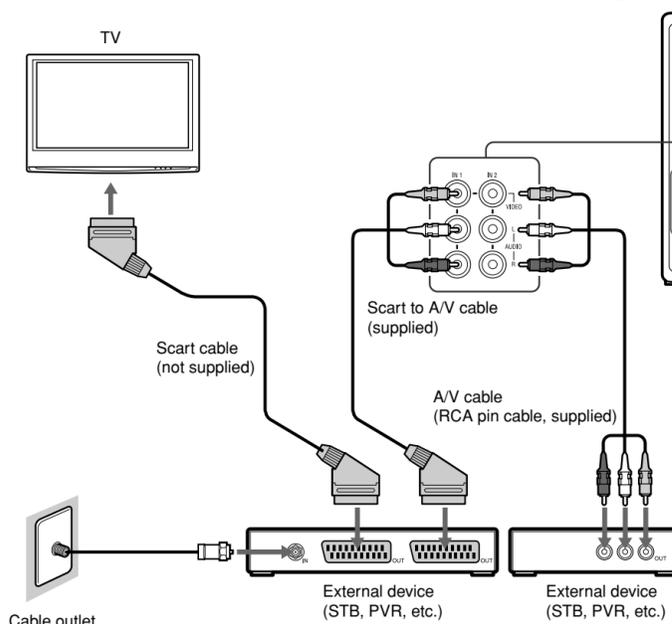

To use this product with your PSP™ system, version 2.70 or higher is required. For details of the system software update, see (http://www.yourpsp.com/).

Connect to Your External Devices and the Internet, and Turn On the Base Station

1 Attach the Base Station stand.

Holes
Stand
"FRONT" mark
Claws

2 Connect to external devices (such as DVD players, etc.).

TV

Scart cable (not supplied)

Scart to A/V cable (supplied)

A/V cable (RCA pin cable, supplied)

Cable outlet

External device (STB, PVR, etc.)

External device (STB, PVR, etc.)

to the Internet

Modem with internal router

to LAN port

Base Station

DSL or cable modem with internal router (UPnP compatible) *

to the Internet

To download remote control data or perform a software version update of the Base Station, you must connect the Base Station to the Internet.

* To determine the type of your modem, check with your Internet service provider.

Register your PSP™ system with the Base Station

1 Turn on the PSP™ system, and then turn on the wireless LAN switch of the PSP™ system.
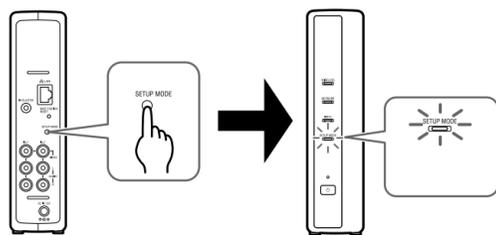

2 Select 🖥️ under 🌐 from the home menu.
The setting screen for use of LocationFree Player is displayed. Press the right button to go to the next screen.
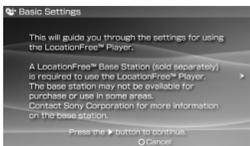

3 Select [Start], and then press the ⊗ button.

4 Press the SETUP MODE button on the rear of the Base Station.
With the Base Station turned on, press and hold the button until the SETUP MODE LED starts to blink.

SETUP MODE

Wait until the registration with the Base Station and network settings for establishing a connection from the PSP™ system with the Base Station are completed. This is an automatic process.

Notes
• If more than 5 minutes pass from when the SETUP MODE LED starts to blink, the LED will go from blinking to fully lit and the Base Station will no longer register the PSP™ system. In this case, press the SETUP MODE button on the rear of the Base Station again and hold the button down until the LED starts to blink.
• If a message stating "Base Station update required" is displayed, you must perform a software version update. For details, refer to the Operating Instructions of the LF-PK1.
• If you cannot complete the registration of your PSP™ system with the Base Station, update your PSP™ system software. For more details, refer to "Setting and Usage Guide for PSP™ (PlayStation®Portable) System". You can download this guide (PDF file) from the LocationFree Support web site at http://www.sony.net/Products/LocationFree/support/.

5 Check the setting list.
Press the ⊗ button to finish the settings. A network settings list is displayed.

6 Connect to the Base Station.
Select [LocationFree AP], and then press the ⊗ button. A connection to the Base Station is established.

7 The video screen is displayed.
When a connection to the Base Station is established, the video screen will be displayed.

Note
Make sure that the external device is turned on. Otherwise, you may see no picture.

Configure the video settings

■ Configure the on-screen remote control for video
(For connecting to external devices, as instructed in 3 of STEP 1)

You can adjust settings for the on-screen remote control that will be used to operate external devices such as STB or PVR that are connected to the Base Station. To adjust these settings, Memory Stick Duo™ media is required.

1 Press the △ button during video playback. Select 🖥️ from the LocationFree Player control panel, and then press the ⊗ button.

2 Select [Remote Control Settings], and then press the ⊗ button.

3 Select [Video 1] or [Video 2] for the connected external device you want to use the remote control for, and then press the ⊗ button.

4 A message appears indicating that you need to download remote control data. Select [Yes], and then press the ⊗ button.
Follow the on-screen instructions to download remote control data onto Memory Stick Duo™ media.

5 After downloading, reconnect to the Base Station.

6 Perform Step 1 to 3 again.

7 Select the manufacturer of the connected external device, and then press the right button.

8 Select the product type of the connected external device, and then press the right button.

9 Test the remote control to make sure it works, and then press the right button.
By selecting [Power] and then pressing the ⊗ button, you can turn the external device on and off.
In some cases it may take as long as 5 seconds for the external device to turn on after you press the ⊗ button.

10 Save your settings.
Press the ⊗ button to save settings on the PSP™ system.

Notes
• Even if the power turns on and off correctly with [Power], other buttons may not be enabled. If this happens, select [Video 1] or [Video 2] from the Index. With the on-screen remote control, confirm that the buttons are enabled.
• Try all the models that appear on the screen to select the most suitable on-screen remote control for the connected devices.
• The button names or button numbers of the on-screen remote control may differ from those of the remote control supplied with your device.

■ Configure the colour system for video
(For watching video in PAL, SECAM, PAL60, NTSC, etc.)

1 Press the △ button during video playback. Select 🖥️ from the LocationFree Player control panel, and then press the ⊗ button.

2 Select [Advanced Settings], and then press the ⊗ button.

3 Select [Video Signal Settings], and then press the ⊗ button.

4 Select a colour system, and then press the ⊗ button.

5 Select [OK], and then press the ⊗ button.
To enable the change of the colour system settings, you need to disconnect the NetAV connection once, and then reconnect it.

Setup to Watch Video On the Go

Make Easy Setup Settings for the Base Station with Your PSP™ System

1 Check that the Base Station is turned on.

2 Press the △ button during video playback. Select 🖥️ from the LocationFree Player control panel, and then press the ⊗ button.

3 Select [Base Station Settings], and then press the ⊗ button.

4 Select [Enter], and then press the ⊗ button.

SONY
LocationFree
Base Station Settings
Enter

5 Enter the user name and password, select [OK], and then press the ⊗ button.
User name : lfx (lowercase letters)
Initial password: WebPassword printed on the sticker of the Base Station.

Enter your user name and password.

✱ Follow the on-screen instructions to proceed to the NetAV check. In the [NetAV Setup] page, read the supplied Dynamic DNS Terms-of-Use Agreement, select the radio button, [NEXT], and then press the ⊗ button.

7 If [Success] appears in the [NetAV Check] screen, select [Menu], and then press the ⊗ button.
The display will return to the initial screen. Select [Exit Setup], press the ⊗ button, and then close the Internet browser by pressing the ◎ button.

💡 **Tip**
If [Setup Incomplete] appears in the [NetAV Check] screen, select [Details] and press ⊗ button. Read the explanation on that screen and make the necessary settings.

Afterwards

Use the PSP™ system to watch video.

For details on settings and operation of the PSP™ system, refer to "Setting and Usage Guide for PSP™ (PlayStation®Portable) System". You can download this guide (PDF file) from the LocationFree Support web site at http://www.sony.net/Products/LocationFree/support/.
