Features and Functions inside

- Recharge power battery
- Safety function
- Overcharge prevention function / Safety timer / Abnormal temperature

Please read the following instructions carefully before use.

- Charge LED indicator / Green LED indicator / USB output port / Micro USB input port / USB connector / Micro USB connector

Orange LED indicator status

This indicator shows charging conditions of the unit.

LED indicator	Charging conditions
Flashes twice	Malfunction
Flashes rapidly	Malfunction

Green LED indicator

This indicator shows power supplying conditions to the portable device.

LED indicator	Power Supplying conditions
Flashes slowly	Low battery
Flashes rapidly	Malfunction

* If a malfunction occurs, stop use until your Sony dealer or authorized service center.

To Charge the Unit

- Connect the micro USB connector of the supplied USB cable to the micro USB input port of the unit.
- Connect the other end of the supplied USB cable to the USB port of a computer.

To Check Remaining Power

The orange LED indicator flashes depending on the remaining power.

LED indicator	Remaining power
Flashes three times x 2	Low
Flashes once x 2	Low

* You can check remaining power only when the USB cable is connected to the unit.

To Supply Power to a Portable Device

- Connect the USB charging cable (officially supported by the portable device) to the orange LED indicator cable correctly.
- Connect the other end of the supplied USB cable to the USB output port of the unit when charging is complete.

Notes

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Do not connect the USB output port of the unit to a power supply other than a computer or a power supply unit.

Charging Time

Built-in Battery	Charging Time
3.8 V (typ. 2.80 mAh / 1.0 A)	Approx. 7 hours (from 1.0 A AC Adapter)

* Recharging using a USB output AC adapter rated at 3 V or 5.0 A or greater is not supported.

* Please make this product's maximum input current 1.0 A.

* Supply time varies depending on battery condition, ambient conditions and portable device.

Specifications

Model	DC5V 1.0 A
Charge	DC5 V 1.0 A (Max.) 3,100 mAh
Output	DC5 V 1.0 A (Max.) 3,100 mAh
Weight	Approx. 135 g
Dimensions (W x H x D)	Approx. 130 mm x 60 mm x 20 mm

* In the operating temperature range.

* Operating temperature is subject to change without notice.

Troubleshooting

Charging time of the unit is short (charging takes less than 7 hours from a fully charged battery)

- Check the charging time of the unit. It may be shorter than the standard charging time.
- Check the charging time of the unit. It may be shorter than the standard charging time.

The unit has reached the end of its service life or is malfunctioning.

- Check the charging time of the unit. It may be shorter than the standard charging time.
- Check the charging time of the unit. It may be shorter than the standard charging time.

* If a malfunction occurs, contact your Sony dealer or authorized Sony service center.

The unit cannot supply power to a portable device, or the green LED indicator does not turn.

- Check the charging time of the unit. It may be shorter than the standard charging time.
