CDX-M7850

© 2005 Sony Corporation

Cautions

- This unit is designed for negative earth 12 V DC operation only.
- Do not get the leads under a screw, or caught in moving parts (e.g. seat railing).
- Before making connections, turn the car ignition off to avoid short circuits.
- Connect the power connecting lead ③ to the unit and speakers before connecting it to the auxiliary power connector.
- Run all earth leads to a common earth point.**
- Be sure to insulate any loose unconnected leads with electrical tape or similar.

Notes on the power supply lead (yellow)

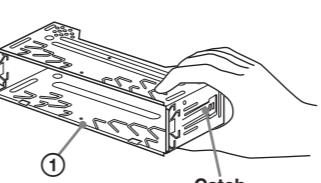

- When connecting the power supply lead to other stereo components, the connected car circuit's rating must be higher than the sum of each component's fuse.
- When no car circuits are rated high enough, connect the unit directly to the battery.

Parts list (1)

- The numbers in the list are keyed to those in the illustration.
- The bracket ① and the protection collar ② are attached to the unit before shipping. Before mounting the unit, use the release keys ⑤ to remove the bracket ① and the protection collar ② from the unit. For details, see "Removing protection collar and the bracket ①" on the reverse side of the sheet.

Keep the release keys ⑤ for future use as they are also necessary to remove the unit from your car.

Caution
Handle the bracket ① carefully to avoid injuring your fingers.

Note
Before installing, make sure that the catches on both sides of the bracket ① are bent inward 2 mm. If the catches are straight or bent outwards, the unit will not be installed securely and may spring out.

Connection example (2)

- Notes (2-A)**
• Be sure to connect the earth lead before connecting the amplifier.

Tip (2-B)
For connecting two or more CD/MD changers, the source selector XA-C30 (optional) is necessary.

Connection diagram (3)

- A To AMP REMOTE IN of an optional power amplifier**
This connection is only for amplifiers. Connecting any other system may damage the unit.

- B To the interface cable of a car telephone**

Warning
If you have a power aerial without a relay box, connect this unit with the supplied power connecting lead ③ instead of the power connecting lead ④.

Notes on the control power lead
• The power aerial control lead ④ supplies 12 V DC when you turn on the tuner, or when you activate the AF (Alternative Frequency) function.

• When your car has built-in FM/MW/LW aerial in the rear/rear side glass, connect the power aerial control lead (blue) to the aerial terminal of the rear/rear side glass instead of the existing aerial booster. For details, consult your dealer.

• A power aerial with a relay box cannot be used with this unit.

Memory hold connection
When the yellow power input lead is connected, power will always be supplied to the memory circuit even when the ignition switch is turned off.

Notes on speaker connection
• Before connecting the speakers, turn the ignition switch.

• Use speakers with an impedance of 4 to 8 ohms, and with a power rating of at least 50 W to prevent damage to the speakers.

• Do not connect the speaker terminals to the chassis, or connect the terminals of the right speakers with those of the left speakers.

• Do not connect the earth lead of this unit to the negative (-) terminal of the speaker.

• Do not connect the speakers in parallel.

• Connect only passive speakers. Connecting active speakers (with built-in amplifiers) to the speaker terminals may damage the speakers.

• To avoid a malfunction, do not use the built-in speaker leads instead of your own. Share a common negative (-) lead for the left and right speakers.

• Do not connect the unit's speaker leads to each other.

Note on connecting speakers

If speaker and amplifier are not connected correctly, "FAILURE" appears in the display. In this case, make sure the speaker and amplifier are connected correctly.

Notes on the car stereo system

• The car stereo system must be connected to the power aerial control lead ④.

• The car stereo system must be connected to the power aerial control lead ④.

• The car stereo system must be connected to the power aerial control lead ④.

• The car stereo system must be connected to the power aerial control lead ④.

Precautions

- Choose the installation location carefully so that the unit will not interfere with normal driving operations.
- Avoid installing the unit in areas subject to dust, excess vibration, or high temperature, such as in direct sunlight or near heater ducts.
- Use only the supplied mounting hardware for a safe and secure installation.

Mounting angle adjustment

Adjust the mounting angle to less than 45°.

Removing the protection collar and the bracket (4)

Before installing the unit, remove the protection collar (5) and the bracket (1) from the unit.

1 Remove the protection collar (5).

① Engage the release keys (4) together with the protection collar (5).

② Pull out the release keys (4) to remove the protection collar (5).

2 Remove the bracket (1).

① Insert both release keys (4) together between the unit and the bracket (1) until they click.

② Pull down the bracket (1), then pull up the unit to separate.

Mounting example (5)

Installation in the dashboard

Notes

• Bend these claws outward for a tight fit, if necessary (5-2).

• Make sure that the 4 catches on the protection collar (5) are properly engaged in the slots of the unit (5-3).

• Make sure that the 4 catches on the protection collar (5) are properly engaged in the slots of the unit (5-3).

How to detach and attach the front panel (6)

Before installing the unit, detach the front panel.

6-A To detach

Before detaching the front panel, be sure to press (OFF).

Press (6), then slide the front panel to the left, and gently pull out the front panel towards you.

6-B To attach

Place the hole (6) of the front panel onto the spindle (8) on the unit, then lightly push the left side in.

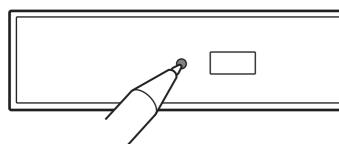

Warning if your car's ignition has no ACC position

After turning off the ignition, be sure to press and hold (OFF) on the unit until the display disappears.

Otherwise, the display does not turn off and this causes battery drain.

RESET button

When the installation and connections are completed, be sure to press the RESET button with a ballpoint pen, etc., after detaching the front panel.

Sicherheitshinweise

- Wählen Sie den Einbauort sorgfältig so aus, dass das Gerät beim Fahren nicht hinderlich ist.
- Bauen Sie das Gerät so ein, dass es keinen hohen Widerstand aufweist und keinen Kontakt mit dem Motor oder anderen heißen Teilen der Heizung, keinem Staub, keinem Schmutz und keinen starken Vibrationen ausgesetzt ist.
- Für eine sichere Befestigung verwenden Sie stets die mitgelieferten Montageteile.

Hinweis zum Montagewinkel!

Das Gerät sollte in einem Winkel von weniger als 45° montiert werden.

Abnehmen der Schutzzumrandung und der Halterung (4)

Nehmen Sie vor dem Installieren des Geräts die Schutzzumrandung (5) und die Halterung (1) vom Gerät ab.

1 Entfernen der Schutzzumrandung (5).

① Setzen Sie beide Löseschlüssele (4) an der Schutzzumrandung (5) an.

② Ziehen Sie die Schutzzumrandung (5) mithilfe der Löseschlüssele (4) heraus.

2 Entfernen Sie die Halterung (1).

① Führen Sie beide Löseschlüssele (4) zwischen dem Gerät und der Halterung (1) ein, bis sie mit einer Klickern einrasten.

② Ziehen Sie die Halterung (1) nach unten und das Gerät nach oben, um die beiden zu trennen.

Montagebeispiel (5)

Installation im Armaturenbrett

Hinweise

- Bevor Sie die Frontplatte abnehmen, beugen Sie diese Klammern für einen sicheren Halt nach außen (5-2).
- Achten Sie darauf, die 4 Verriegelungen an der Schutzzumrandung (5) korrekt in die Aussparungen am Gerät einzusetzen (5-3).

Aftage beskyttelsesrammen og konsollen (4)

Tag beskyttelsesrammen (5) og konsollen (1) af enheden, inden du installerer enheden.

1 Tag beskyttelsesrammen af (5).

① Sæt udlesermøllerne (4) i indgreb sammen med beskyttelsesrammen (5).

② Træk udlesermøllerne (4) ud for at fjerne beskyttelsesrammen (5).

2 Tag konsollen af (1).

① Isæt begge udlesermøller (4) sammen mellem enheden og konsollen (1), indtil de klikker på plads.

② Træk konsollen (1) ned, og træk derefter enheden op for at adskille.

Monteringseksempel (5)

Installation på instrumentbrættet

Bemærkninger

- Bøj om nødvendigt disse flige udad for at få en stram tilslutning.
- Tag for, at de 4 grebere på beskyttelsesrammen sidder ordentligt i indgreb i enhedens huller (5-2).

Sådan aftages og fastgøres frontpanelet (6)

Tag frontpanelet af, inden du installerer enheden.

6-A Tag af

Inden du tager frontpanelet af skal du sørge for at trække på (OFF). Tryk på (6), og skyd derefter frontpanelet mod venstre, og træk frontpanelet forsigtigt ud mod dig selv.

6-B Fastgøre

Placer hullet (6) på frontpanelet ovenpå enhedens tap (8), og skyd derefter venstre side ind.

6-C Klinnittämien

Aseta ettuapuneelin irrottaminen ulos reikä (6) laitteen karanan (8) ja työnnä sen jälkeen sen vasen reunan kevysti sisään.

Advarsel, hvis der i bilens tænding ikke er en ACC-stilling

Netværkstændingen (ACC) skal være aktiveret, før du trykker på hullet (6) på frontpanelet.

Varoitus, joka koskee autoa, jonka virtalukossa ei ole ACC-asentoa.

Kun virta on sammutettu autosta, paina ja pidä painettuna laiteen (OFF)-painiketta, kunnes näyttö sammutuu.

Muista irtapuoleinen näyttö ei sammu, mikä kuluttaa virtuaa aiempaa.

RESET-knap

Når installasjonen og tilslutningen er avsluttet, skal du sørge for at trykke på RESET-knappen med en kulepen, etc., etter først at frontpanelet er fjernet.

RESET-painike

Kun asennus ja liittäminen on tehty valmiiksi, paina RESET-painiketta esim. kuulakärkivälinnä tai vastaavalla seuraavalla.

Jos laite on kytketty välittömästi, paina ja pidä painettuna laiteen (OFF)-painiketta, kunnes näyttö sammutuu.

Muista irtapuoleinen näyttö ei sammu, mikä kuluttaa virtuaa aiempaa.

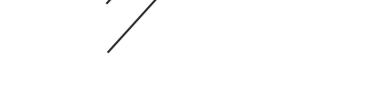

Taste RESET

Wenn Sie das Gerät eingeschaltet haben, halten Sie am Gerät unbedingt (OFF) gedrückt, bis die Anzeige ausgeschaltet wird.

Andernfalls wird die Anzeige nicht ausgeschaltet und der Autobatterie wird Strom entzogen.

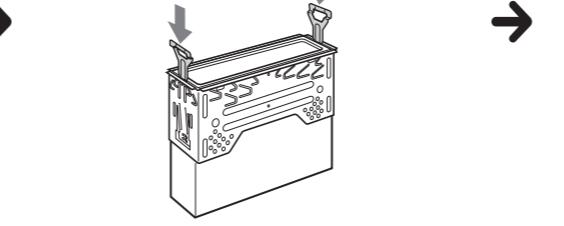

RESET-knapp

Wenn Sie das Gerät eingeschaltet und alle Anschlüsse vorgenommen haben, müssen Sie die Frontplatte abnehmen und mit einem Kugelschreiber oder einem anderen spitzen Gegenstand die Taste RESET drücken.

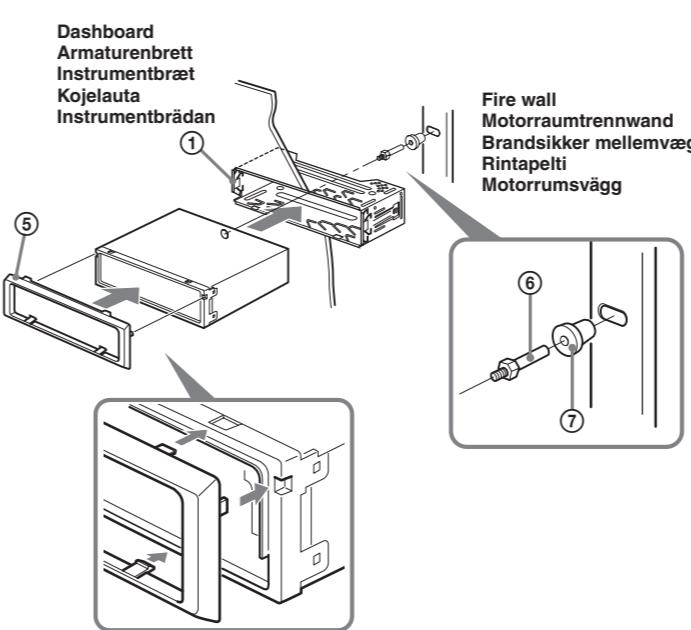

2

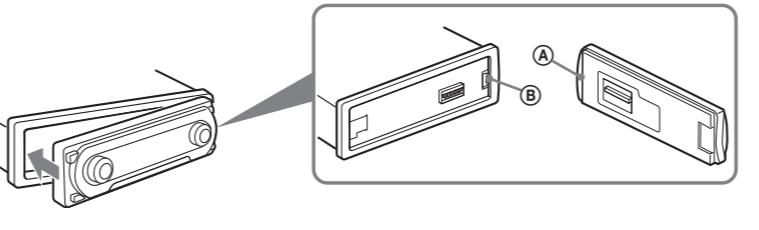

Face the hook inwards.
Der Haken muss nach innen weisen.
Ret krogen inad.
Niin, että koukku osoittaa sisään.
Rikta haken inåt.

Power connection diagram

Auxiliary power connector may vary depending on the car. Check your car's auxiliary power connector diagram to make sure the connections match correctly. There are three types of connectors (konektorit) on the stereo's power connecting lead. You need to switch the positions of the red and blue wires in the car's power supply. After matching the connections and switched power supply leads correctly, connect the unit to the car's power supply. If you have any questions and problems connecting your unit that are not covered in this manual, please consult the car dealer.

Virtaohjausliittimen kytkentäkaavio

Ylimääräiset virtaohjaimet voivat vaihdella autosta toiseen. Tarkista autoon kytketään virtaohjausliittimen kaavio, joita käytetään tiettyissä autoissa. Käytä ohjausliittimen kytkentäkaavion mukaan. Kun liittäminen ja kytkeminen on tehty, kytke autoon virtaohjausliittimen kaavio. Kun liittäminen ja kytkeminen on tehty, kytke autoon virtaohjausliittimen kaavio. Tämä onnistuu vain silloin, kun virtaohjausliittimen kaavio on oikea. Jos liittäminen ei onnistu, pyydä auton myymisen yhteydessä teknisen tuen saamista.

Stromanschlussdiagramm

Der Hilfstromanschluss kann je nach Fahrzeug unterschiedlich sein. Sehen Sie im Hilfstromanschlussdiagramm für Ihr Fahrzeug nach, wie die Verbindungen entsprechend sind. Wenn die Verbindungen nicht übereinstimmen, müssen Sie die Positionen der roten und blauen Leitungen austauschen. Es gibt drei verschiedene Typen von Anschlüssen (Kontakte) an der Stereo-Verbindungsleitung. Sie müssen möglicherweise die rote und gelbe Leitung vertauschen.

Stellen Sie die Anschlüsse hier schrittweise ein, um sicherzustellen, dass die Stromversorgungsleitungen richtig an und verbunden sind. Wenn Sie dann das Gerät mit der Stromversorgung Ihres Fahrzeugs verbinden, wenn beim Anschließen des Geräts Fragen oder Probleme auftreten, die in dieser Bedienungsanleitung nicht erläutert werden, wenden Sie sich bitte an den Autohändler.

Strömtillslutningsdiagram

Stromstik til ekstraudstyr kan variere, afhængigt af bilen. Kontroller, hvilket type af ekstraudstyr der bruges. Der findes tre grundlæggende typer (afhængigt af modelen). Det kan være nødvendigt at ombytte de røde og gule ledningers placering i bilstereoanleggets strømforsyning. Etter å ha kontrollert at de forskjellige strømforsyningssløyfene skal tilhøre samme bil, må man bytte ledningene om hvis de ikke fungerer korrekt. Denne vejledning skal du kontakte bilforhandleren.

Kopplingsschema

Kontakten för strömförsljning av extrautrustning kan se olika ut i olika bilar. Kontroller bilens kopplingsschema för strömförsljning av extrautrustning för att vara säker på att kopplingarna är korrekta. Det finns olika typer av bilsmodeller och kopplingarna kan se olika ut. Kun tillämpas ja kytkeytäin varustet virratjohdon mukana ja kytkeytäin johdon kytkeytäin. Kun tillämpas ja kytkeytäin varustet virratjohdon mukana ja kytkeytäin johdon kytkeytäin. Efter att anslutningarna och de switchade strömförsljöringskablarna har kopplats korrekt, anslut enheten till bilens strömförsljning. Kontakta din bilåterförsäljare om du har problem eller har frågor som inte täcks i den här bruksanvisningen.
