Welcome to navigation with TomTom

This User Manual explains all you need to know about your new TomTom Navigation App.

If you want a quick read of the essentials, we recommend that you read the [Whats on the screen](#) chapter. This covers the most important screens and buttons.

After that, you will probably want to learn more about [Using Quick Search](#) or [Planning a route](#).

Quick links:

- [What's on the screen](#)
- [Using gestures](#)
- [Navigation buttons](#)
- [Using Quick Search](#)
- [Planning a route](#)

We hope you enjoy reading about and, most importantly, using your new TomTom Navigation App!

Get going

GPS reception

When you first start your TomTom Navigation App, it may need a few minutes to determine your position. In future, your position will be found much faster.

What's on the screen

The map view

The map view is shown when you have no planned route. Your actual location is shown as soon as your TomTom Navigation App has found your GPS location.

You can use map view in the same way as you might look at a traditional paper map. You can move around the map using [gestures](#), and zoom using the zoom buttons.

Important: Everything on the map is interactive including the route and the map symbols - try selecting something and see what it does!

Tip: To open a pop-up menu for an item on the map, for example a route or a POI, select the item to open the menu. To select a location on the map, select and hold the location until the pop-up menu opens.

The map shows your current location and many other locations such as your [My Places](#) locations.

If you have not planned a route the map is zoomed out to show the area around your location. If you have planned a route, your complete route is shown on the map. You can [add stops](#) to your route directly from the map. When you start to drive, the [guidance view](#) is shown.

1. Switch view button. Select the switch view button to change between the map view and the guidance view.
2. Zoom buttons. Select the zoom buttons to zoom in and out.
3. Your route, if you have [planned a route](#). Select the route to clear it, change the route type, add a stop or save changes to your route.
4. Map symbols. Symbols are used on the map to show your destination and your saved places:

Your destination.

Your home location. You can set your home location in [My Places](#).

Your work location. You can set your work location in [My Places](#).

A [stop](#) on your route.

A location saved in [My Places](#).

When a search for POIs near destination is done and the results are shown on the map, less important POIs are shown as black pins with white crosses.

Select a map symbol to open the pop-up menu, then select the menu button to see a list of actions you can take.

5. Main Menu button. Select the button to open the [Main Menu](#).
6. Current location. This symbol shows your current location. Select it to add it to My Places or search near your current location.

Note: If your TomTom Navigation App cannot find your location the symbol appears grey.

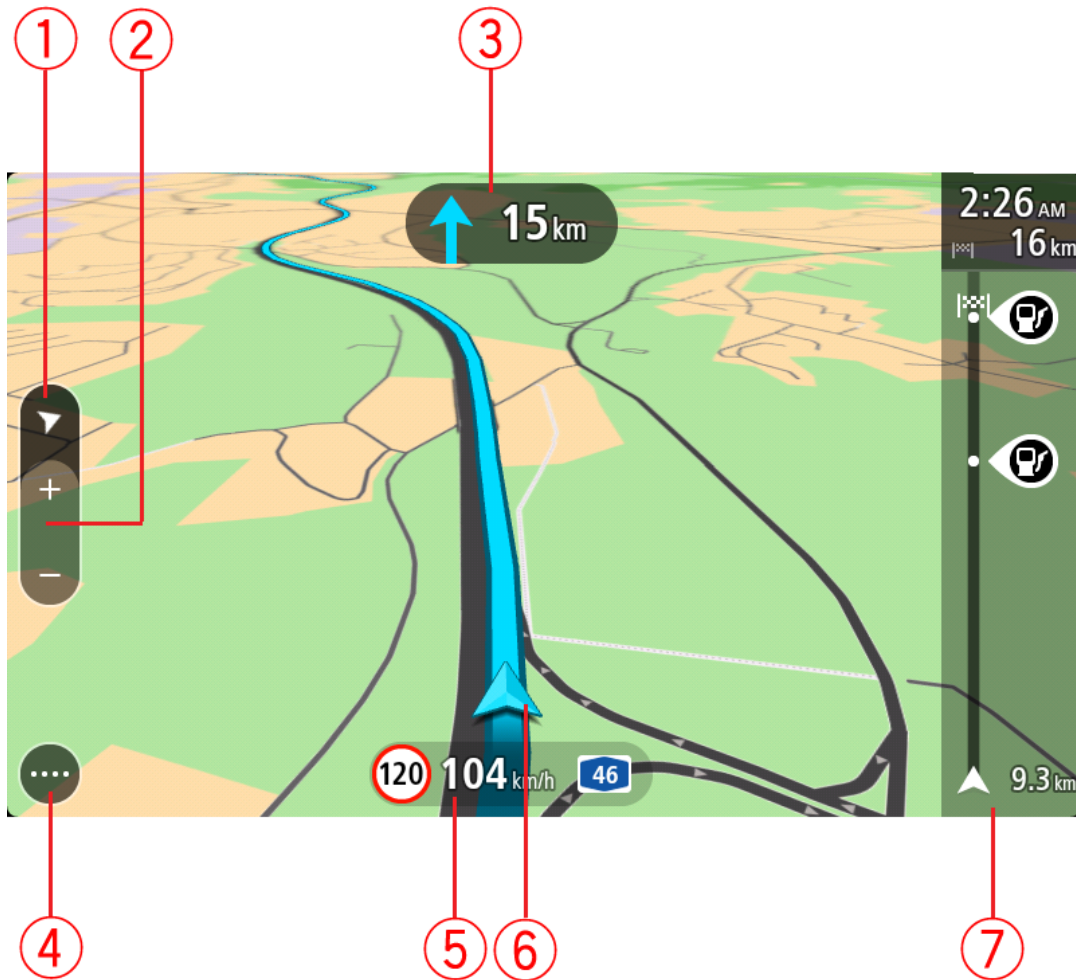

7. Selected location. Press and hold to [select a location](#) on the map. Select the pop-up menu button to show options for the location, or select the **Drive** button to plan a route to the location.
8. Route bar. The [route bar](#) is shown when you have planned a route.

The guidance view

The guidance view is used to guide you along the route to your destination. The guidance view is shown when you start driving. You see your current location and details along your route.

The guidance view is normally in 3D. To show a 2D map with the map moving in your direction of travel, change the [2D and 3D default settings](#).

Tip: When you have planned a route and the 3D guidance view is shown, select the switch view button to change to the [map view](#) and use the interactive features.

1. Switch view button. Select the switch view button to change between the map view and the guidance view. When in guidance view, if you are driving, the small arrow rotates to show your current compass bearing relative to north, with north being up.
2. Zoom buttons. Select the zoom buttons to zoom in and out.
3. Instruction panel. This panel shows the following information:
 - The direction of your next turn.
 - The distance to your next turn.
 - The name of the next road on your route.
 - Lane guidance at some junctions.

Note: Select the instruction panel to see a list of turn-by-turn text instructions for your planned route.

4. Main Menu button. Select the button to show the [Main Menu](#).
5. Speed panel. This panel shows the following information:
 - The speed limit at your location.
 - Your current speed. If you drive more than 5 km/h or 3 mph over the speed limit the speed panel turns red. If you drive less than 5 km/h or 3 mph over the speed limit the speed panel turns orange.

- The name of the street you are driving on.
6. Current location. This symbol shows your current location. Select the symbol or the speed panel to open the [quick menu](#).

Note: If your TomTom Navigation App cannot find your location the symbol appears grey.

7. Route bar. The [route bar](#) is shown when you have planned a route.

Important: To see a wider route bar showing additional route information, change the setting for Route Information.

The route bar

The route bar is shown when you have planned a route. It has an arrival information panel at the top, and a bar with symbols underneath.

Important: To see a wider route bar showing additional route information, change the setting for Route Information.

Note: The [distance ahead shown by the route bar](#) depends on the overall length of your route.

The arrival information panel shows the following information:

- The estimated time that you will arrive at your destination.
- The length of time to drive to the destination from your current location.
- A parking button is shown near the destination flag when parking is available near your destination.

Tip: If your destination is in a different time zone, you see a plus (+) or a minus (-) sign and the time difference in hours and half hours in the [arrival information panel](#). The estimated time of arrival is the local time at your destination.

If you have [stops](#) on your route, select this panel to change between information about the next stop and your final destination.

You can [choose the information you see](#) on the arrival information panel.

The bar uses symbols to show the following information:

- The next two [stops](#) on your route.
- [Gas stations](#) - gas stations that are directly on your route.
- [Safety cameras](#) only in Australia.
- Rest stops directly on your route.

You can choose the information you see on your route.

The symbols are in the order that they occur on your route. Select a symbol to see more information about a stop, or a safety camera. If a symbol is shown on top of another symbol, selecting the symbols zooms in on the route bar to show each symbol separately. You can then select a symbol.

The bottom of the route bar represents your current location and shows the distance to the next incident on your route.

The route bar also shows status messages, for example **Finding fastest route** or **Playing route preview**.

Distances and the route bar

The distance ahead shown on the route bar depends on the length of your route, or the distance remaining on your route.

- For remaining distances longer than 50 km (31 miles), only the next 50 km (31 miles) is shown. The destination icon is not shown.

Tip: You can scroll the route bar to see your whole route.

- For remaining distances between 10 km (6 miles) and 50 km (31 miles), the complete distance is shown. The destination icon is shown fixed at the top of the route bar.
- For remaining distances of less than 10 km (6 miles) the complete distance is shown. The destination icon moves down towards the chevron symbol as you get nearer to your destination.

The top half of the route bar shows twice the distance of the bottom half, as shown in the following examples:

- A remaining distance of 50 km on the route bar is split into 34 km (21 miles) at the top and 16 km (9 miles) at the bottom.
- A remaining distance of 10 km on the route bar is split into 6.6 km (4 miles) at the top and 3.3 km (2 miles) at the bottom.

The route bar is constantly updated as you drive.

The quick menu

To open the quick menu, select the current location symbol or the speed panel in the guidance view.

You can then do any of the following:

- [Mark a location](#)
- [Avoid a blocked road](#)
- See your current location or your latitude/longitude if not on a named road.

Navigation buttons

On the [map view](#) or [guidance view](#), select the Main Menu button to open the Main Menu.

The following navigation buttons are available in the Main Menu:

Search

Select this button to search for an address, a place or a Point of Interest, then [plan a route](#) to that location.

Drive Home

Select this button to drive to your home location. If this button is not included in your main menu, go to [My Places](#) to set up your home location.

Drive to Work

Select this button to drive to your work location. If this button is not included in your main menu, go to [My Places](#) to set up your work location.

Recent Destination

Select this button to open the list of your recent destinations. Select a recent destination to plan a route to that destination.

Current Route

Select this button to [clear or change](#) your planned route.

My Places

Select this button to show your [saved places](#).

My Routes

Select this button to show your [saved routes](#).

Parking

Select this button to [find car parks](#).

Gas Station

Select this button to [find gas stations](#).

Other buttons

On the map or guidance view, select the Main Menu button to open the Main Menu.

The following buttons are available in the Main Menu screen, in addition to the [navigation buttons](#):

Select this button to open the [Settings Menu](#).

Select this button to open the [Help Menu](#). The Help Menu contains help for using Voice control if supported by your device, together with other information about your TomTom Navigation App. For example, you can do the following:

- See the map version
- See the device serial number and legal information
- Delete all your saved places and settings and restore the standard factory settings to your TomTom Navigation App.

Select this button to [reorder the buttons](#) in the Main Menu.

Select this button to return to the previous screen.

Select this button to return to the [map view](#) or [guidance view](#).

This button shows that you will hear voice instructions. Select the button to switch off voice instructions. You will no longer hear spoken route instructions but you will still hear information such as traffic information and warning sounds.

Tip: You can select the types of instructions you want to hear. Select [Voices](#) in the Settings Menu and select the instructions you want to hear.

This button shows that you will not hear voice instructions. Select this button to switch on voice instructions.

This button shows that the display is using day colors. Select the button to reduce the brightness of the screen and display the map in darker colors. When driving at night or when driving through a dark tunnel, it is easier to view the screen and less distracting for the driver if the brightness of the screen is dimmed.

Tip: Your device automatically switches between day and night colors depending on the time of day. To switch off this feature, select [Appearance](#) in the Settings menu and switch off **Switch to night colors when dark**.

This button shows that the display is using night colors. Select the button to increase the brightness of the screen and display the map in brighter colors.

Volume control

On the map or guidance view, select the Main Menu button to open the Main Menu.

Select and slide the volume control to change the volume of voice instructions and warnings. If the voice instructions are switched off, the volume control will still change the volume of the warnings.

Using gestures

You use gestures to control your TomTom Navigation App.

This Reference Guide explains which gestures to use throughout the guide but here is a complete list of all the gestures you can use.

Drag

Put one finger on the screen and move it across the screen.

Example of when to use this: Scrolling around in the map.

Flick

Flick the tip of a single finger across the screen.

Example of when to use this: Scrolling a big distance on the map.

Press and hold

Put one finger on the screen for more than 0.5 second.

Example of when to use this: Opening the pop-up menu for a place on the map.

Tap or select

Tap a single finger on the screen.

Example of when to use this: Selecting an item in the Main Menu.

Tip: To open a pop-up menu for an item on the map, select and hold the item until the menu opens.

Reordering the Main Menu buttons

To reorder the buttons in the Main Menu to suit your preference, do the following:

1. Select the Main Menu button to open the Main Menu.

2. Press and hold the button you want to move for two seconds.

Tip: Alternatively, select the Edit button in the Main Menu.

The menu button is shown with left and right arrows.

3. Press the left or right arrow on the menu button to move the button to a new position in the menu.
4. Select and move other buttons to the order you want.
5. Select **Done**.

Using Quick Search

About search

You use search to find a wide range of places and then navigate to them. You can search for the following:

- A specific address, for example, type in **123 Oxford Street, London**.
- A partial address, for example, type in **Oxford st Lon**.
- A type of place, for example, type in **gas station** or **restaurant**.
- A place by name, for example, type in **Starbucks**.
- A postcode, for example, type in **W1D 1LL** for Oxford Street, London.
- A city to navigate to a city centre, for example, type in **London**.
- A POI (Point of Interest) near your current location, for example, type in **restaurant near me**.
- A mapcode, for example, type in **WH6SL.TR10**
- Latitude and longitude coordinates, for example, type in:
N 51°30'31" W 0°08'34".

Tip: To search for a specific street in the United Kingdom or the Netherlands, type in a postcode, then leave a space and then type in the house number. For example, **1017CT 35**. For other countries, postcodes are area-based and will give you a list of matching cities, towns and streets in your search results.

Planning a route to a POI using search

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To plan a route to a POI type or a specific POI using search, do the following:

1. Select the Main Menu button to open the Main Menu.

2. Select **Search**.

The search screen opens with the keyboard showing.

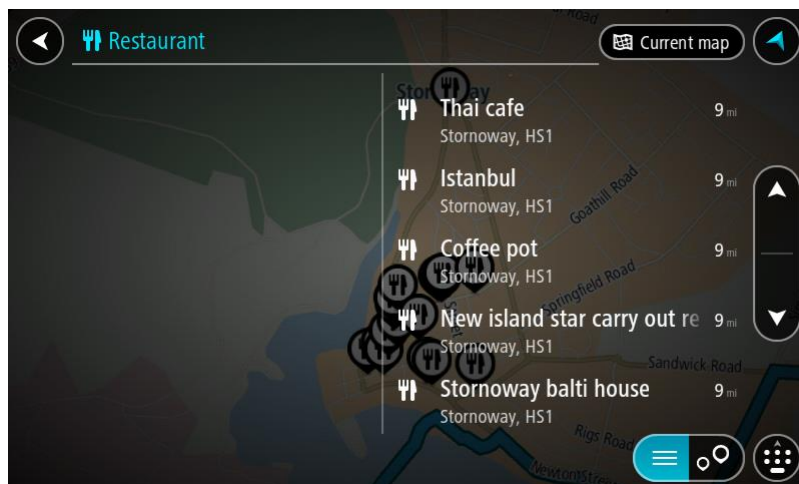

- Use the keyboard to enter the name of the place you want to plan a route to.

You can search for a POI (Point of Interest) type, such as a restaurant or tourist attraction. Alternatively, you can search for a specific POI, for example "Rosie's Pizzeria".

Note: When searching, the whole map is searched. If you want to change how the search is done, select the button to the right of the search box. You can then change where the search is done, for example along the route or in a city.

- As you type, suggestions based on what you have entered are shown in columns. You can continue typing or select a suggestion.

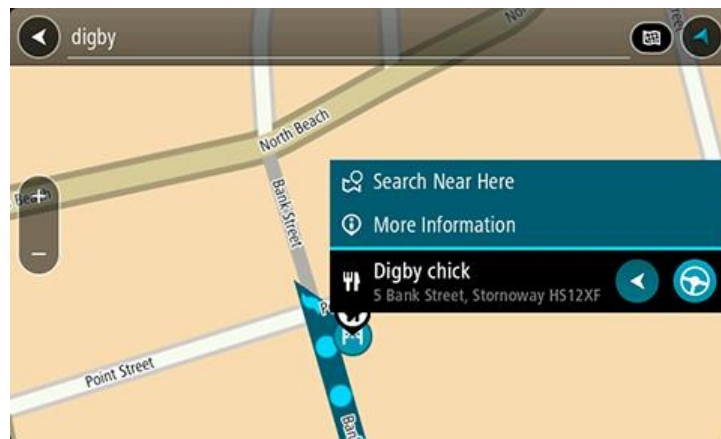

Tip: To see more results, hide the keyboard or scroll down the results list.

Tip: You can switch between seeing the results on the map or in a list by selecting the list/map button:

- Select a POI type or an individual POI. If you selected a POI type, select a POI. The location is shown on the map.

- To see more information about the POI, select the POI on the map and then select the pop-up menu button. Select **More Information** on the pop-up menu.

You see more information about the POI such as the phone number, full address and email.

- To plan a route to this destination, select the drive button:

A route is planned and then guidance to your destination begins. As soon as you start driving, the [guidance view](#) is shown automatically.

Tip: If your destination is in a different time zone, you see a plus (+) or a minus (-) sign and the time difference in hours and half hours in the [arrival information panel](#). The estimated time of arrival is the local time at your destination.

Tip: You can [add a stop to a route](#) that you have already planned.

Tip: You can save a route using [My Routes](#).

Entering search terms

Select **Search** in the [Main menu](#) to start searching for addresses and POIs. The search screen opens showing the keyboard and the following buttons:

1. **Back button.**

Select this button to go back to the previous screen.

2. **Search input box.**

Enter your search term here. As you type, matching addresses and POIs are shown.

Tip: To edit, select a word you have already typed to place the cursor. You can then insert or delete characters.

3. **Type of search.**

By default, the whole of the current map is searched. Once you have used search, the last search type you selected is used. Select this button to change the type of search to any of the following:

Whole map

Select this option to search the whole of your current map with no limit to the search radius. Your current location is the centre of the search. The results are ranked by exact match.

Near me

Select this option to search with your current GPS location as the search centre. The results are ranked by distance.

In town or city

Select this option to use a town or city as the centre for your search. You need to enter the town or city name using the keyboard. When you have selected the town or city from the results list, you can search for an address or POI in that city.

Along route

When a route has been planned, you can select this option to search along your route for a specific type of location, for example, gas stations. When prompted, enter the type of location and then select it in the right-hand column to carry out the search.

Near destination

When a route has been planned, you can select this option to use your destination as the centre for your search.

Latitude Longitude

Select this option to enter a pair of latitude longitude coordinates.

4. View button.

Select this button to return to the [map view](#) or [guidance view](#).

5. Caps Lock button.

6. Show/hide keyboard.

7. Change keyboard language.

Tip: Select the **Caps Lock button** once to make the next letter you type upper case. Double tap the **Caps Lock button** to use Caps-Lock where all the letters you type are upper case. Select the **Caps Lock button** once to quit Caps-Lock.

Tip: To cancel a search, select the map/guidance view button in the top right-hand corner of the screen.

Working with search results

Your search results are shown in two columns.

Address and city matches are shown in the left-hand column, and POIs, types of POIs and Places are shown in the right-hand column. Recent destinations and saved places are also shown in your search results.

Tip: To see more results, hide the keyboard or scroll down the results list.

Tip: You can switch between seeing the results on the map or in a list by selecting the list/map button:

When you select an address from the list of search results, you can choose to show it on the map, add a crossroad or plan a route to that chosen location. To get an exact address you can add the house number.

If you show the result on the map, you can use the pop-up menu to [add the location](#) to My Places. If a route is already planned, you can add the location to your current route.

Note: The best search results are shown on the map. When you zoom in, the lower ranked search results are gradually shown.

About postcodes

When searching using a postcode, your results depend on the type of postcode used in the country that you are searching in.

The following types of postcodes are used:

- Postcodes that navigate you to a street or part of a street.
- Postcodes that navigate you to an area comprising, for example, a single town, several villages in a rural area or a district in a large city.

Postcodes for streets

Countries such as the Netherlands and the United Kingdom use this type of postcode. When you search using this type of postcode, enter the postcode, then leave a space and then optionally enter the house number. For example, "1017CT 35". Your device then plans a route to a specific house or building on a specific street.

Postcodes for areas

Countries such as Germany, France and Belgium use this type of postcode. If you search using a postcode for an area, your results include all the streets in a city district, the whole town, or the villages within that postcode.

You may get results from multiple countries if you enter a postcode for an area.

Note: If you search using a postcode for an area, you will not get a specific address in your results.

This type of postcode is still very useful in reducing the number of search results. For example, a search for Neustadt in Germany returns a long list of possible results. Adding a space followed by the postcode for an area narrows the results down to the Neustadt that you are looking for.

As another example, if you want to search in a city, enter a postcode for an area and select the city centre you are searching for from the results.

About mapcodes

In countries where roads and houses have no names or addresses, you can use a mapcode instead. A mapcode represents a location.

Every location on Earth, including those in the sea like islands and oil rigs, can be represented by a mapcode. Mapcodes are short, and easy to recognise, remember and communicate. They are precise to a few metres, which is good enough for every-day use.

Go to mapcode.com for instructions on how to find the mapcode for a location.

Mapcodes are more precise and more flexible than the address on a business card. You can choose a location that you want to associate with your address, for example, the main entrance or the entrance to a car park.

Planning a route

Planning a route to an address using search

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To plan a route to an address using search, do the following:

1. Select the Main Menu button to open the Main Menu.

2. Select Search.

The search screen opens with the keyboard showing.

3. Use the keyboard to enter the name of the place you want to plan a route to.

You can search for an address, town, city, postcode or [mapcode](#).

Tip: To search for a specific street in the United Kingdom or the Netherlands, type in a post-code, then leave a space and then type in the house number. For example, **1017CT 35**. For other countries, postcodes are area-based and will give you a list of matching cities, towns and streets in your search results.

Note: When searching, the whole map is searched. If you want to change how the search is done, select the button to the right of the search box. You can then change where the search is done, for example, to being along the route or in a city.

4. As you type the address, suggestions based on what you have entered are shown in columns. You can continue typing or select a suggestion.

Tip: To see more results, hide the keyboard or scroll down the results list.

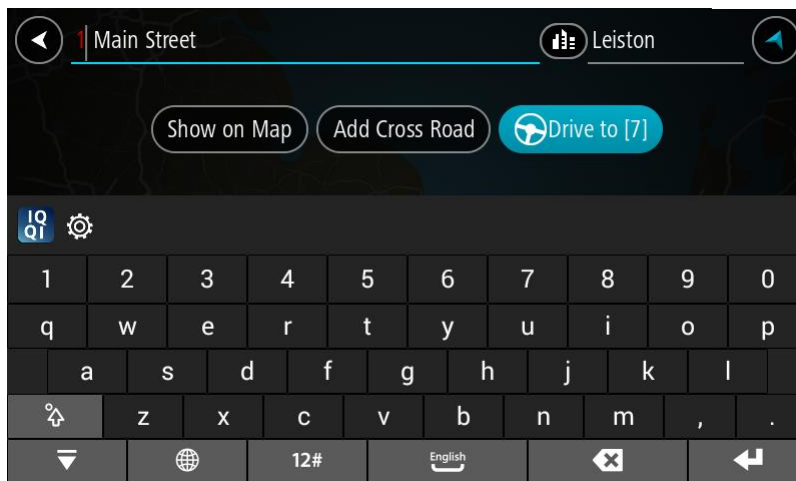

Tip: You can switch between seeing the results on the map or in a list by selecting the list/map button:

5. Select an address suggestion.

6. Enter the house number if you have one and haven't entered it already.

Tip: If you enter a house number that is not found, then the number appears red. The nearest house number that is found is shown in the Drive button. You can enter a new house number, or you can select Drive to drive to the nearest house number.

7. Select **Drive**.

A route is planned and then guidance to your destination begins. As soon as you start driving, the [guidance view](#) is shown automatically.

Tip: If your destination is in a different time zone, you see a plus (+) or a minus (-) sign and the time difference in hours and half hours in the [arrival information panel](#). The estimated time of arrival is the local time at your destination.

Tip: You can [add a stop to a route](#) that you have already planned.

Tip: You can save a route using [My Routes](#).

Planning a route to a city centre

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To plan a route to a city centre using search, do the following:

1. Select the Main Menu button to open the Main Menu.

2. Select **Search**.

The search screen opens with the keyboard showing.

3. Use the keyboard to enter the name of the city or town you want to plan a route to.

You can search for a town, city, or postcode.

Tip: To search for a specific city you can use the city's postcode or the country. For example, searching for Essen will return many results. If you search for Essen 2910 or Essen Belgium then that city will be at the top of the results. You can then search in the city.

Tip: When searching, the whole map is searched. If you want to change how the search is done, select the button to the right of the search box. You can then change where the search is done, for example, to being along the route or in a city.

4. As you type the address, suggestions based on what you have entered are shown in columns. You can continue typing or select a suggestion.

Tip: To see more results, hide the keyboard or scroll down the results list.

Tip: You can switch between seeing the results on the map or in a list by selecting the list/map button:

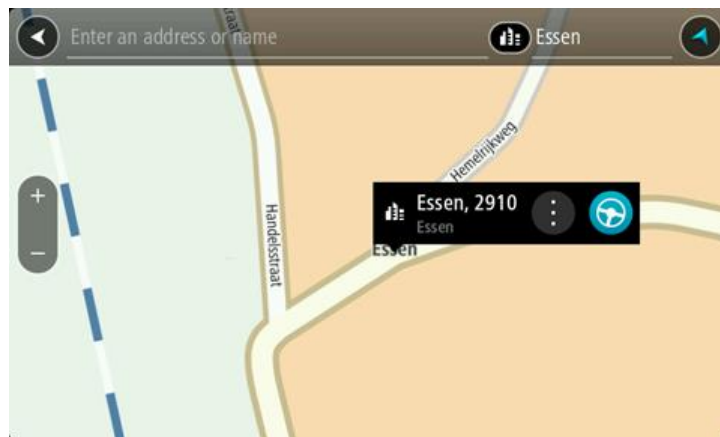

5. Select the city in the left-hand column.

The city name is shown in the right side of the search input box, and the city centre POI is shown below in the right-hand column.

6. Select the city centre POI.
The city centre location is shown on the map.

7. Select **Drive/Ride** depending on which device you are using.
A route is planned and then guidance to your destination begins. As soon as you start driving, the [guidance view](#) is shown automatically.

Tip: If your destination is in a different time zone, you see a plus (+) or a minus (-) sign and the time difference in hours and half hours in the [arrival information panel](#). The estimated time of arrival is the local time at your destination.

Tip: You can [add a stop to a route](#) that you have already planned.

Tip: You can save a route using [My Routes](#).

Planning a route using the map

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To plan a route using the map, do the following:

1. [Move the map](#) and zoom in until you can see the destination that you want to navigate to.

Tip: You can also select a map symbol to open the pop-up menu, then select the **Drive/Ride** button to plan a route to that location.

2. When you have found your destination on the map, select it by pressing and holding the screen for about one second.

A pop-up menu shows the nearest address.

3. To plan a route to this destination, select **Drive/Ride** depending on which device you are using. A route is planned and then guidance to your destination begins. As soon as you start driving, the guidance view is shown automatically.

Tip: You can use the location you selected in other ways, such as adding it to [My Places](#), by selecting the pop-up menu button.

Tip: If your destination is in a different time zone, you see a plus (+) or a minus (-) sign and the time difference in hours and half hours in the [arrival information panel](#). The estimated time of arrival is the local time at your destination.

Tip: You can [add a stop to a route](#) that you have already planned.

Tip: You can save a route using [My Routes](#).

Planning a route using My Places

To navigate to one of [My Places](#) from your current location, do the following:

1. Select the Main Menu button to open the Main Menu.

2. Select **My Places**.

A list of all your Places opens.

3. Select the Place you want to navigate to, for example Home.
Your chosen Place is shown on the map with a pop-up menu.

- To plan a route to this destination, select **Drive/Ride** depending on which device you are using. A route is planned and then guidance to your destination begins. As soon as you start driving, the guidance view is shown automatically.

Tip: If your destination is in a different time zone, you see a plus (+) or a minus (-) sign and the time difference in hours and half hours in the [arrival information panel](#). The estimated time of arrival is the local time at your destination.

Tip: You can [add a stop to a route](#) that you have already planned.

Tip: You can save a route using [My Routes](#).

Planning a route using coordinates

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To plan a route using a pair of coordinates, do the following:

- Select the Main Menu button to open the Main Menu.

- Select **Search**.

The search screen opens with the keyboard showing.

- Select the type of search button to the right of the search box.

- Select **Latitude Longitude**.
- Type in your pair of coordinates. You can enter any of these coordinate types:
 - Decimal values, for example:
N 51.51000 W 0.13454
51.51000 -0.13454

Tip: For decimal values you don't have to use a letter to indicate the latitude and longitude. For locations west of the 0 meridian and locations south of the equator, use a minus sign (-) before the coordinate.

- Degrees, minutes and seconds, for example:
N 51° 30'31" W 0° 08'34"
- GPS standard coordinates, for example:
N 51 30.525 W 0 08.569

Note: The bar below the coordinates goes red if you enter coordinates that are not recognised by your TomTom Navigation App.

- As you type in the coordinates, suggestions are shown based on what you have entered. You can continue typing or select a suggestion. Towns and roads are shown on the left, POIs are shown on the right.

Tip: To see more results, hide the keyboard or scroll down the results list.

Tip: You can switch between seeing the results on the map or in a list by selecting the list/map button:

7. Select a suggestion for your destination.
The location is shown on the map.
8. To plan a route to this destination, select **Drive/Ride** depending on which device you are using. A route is planned and then guidance to your destination begins. As soon as you start driving, the [guidance view](#) is shown automatically.

Tip: If your destination is in a different time zone, you see a plus (+) or a minus (-) sign and the time difference in hours and half hours in the [arrival information panel](#). The estimated time of arrival is the local time at your destination.

Tip: You can [add a stop to a route](#) that you have already planned.

Tip: You can save a route using [My Routes](#).

Planning a route using a mapcode

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To plan a route using a mapcode, do the following:

1. Select the Main Menu button to open the Main Menu.

2. Select **Search**.

The search screen opens with the keyboard showing.

3. Type in your mapcode. You can enter any of these mapcode types:
 - International, for example, WH6SL.TR10.
 - Country-specific, for example, GBR 8MH.51.
 - Alternative country-specific, for example, GBR 28.Y6VH or GBR LDGZ.VXR.

Tip: All the mapcodes in this example are for the same location - Edinburgh Castle in the UK. See [About mapcodes](#) for information on how to get a mapcode for a location.

4. As you type in the mapcode, suggestions are shown based on what you have entered. You can continue typing or select a suggestion.
Towns and roads are shown on the left, POIs are shown on the right.

Tip: To see more results, hide the keyboard or scroll down the results list.

Tip: You can switch between seeing the results on the map or in a list by selecting the list/map button:

5. Select a suggestion for your destination.
6. To plan a route to this destination, select **Drive/Ride** depending on which device you are using. A route is planned and then guidance to your destination begins. As soon as you start driving, the [guidance view](#) is shown automatically.

Tip: If your destination is in a different time zone, you see a plus (+) or a minus (-) sign and the time difference in hours and half hours in the [arrival information panel](#). The estimated time of arrival is the local time at your destination.

Tip: You can [add a stop to a route](#) that you have already planned.

Tip: You can save a route using [My Routes](#).

Finding an alternative route

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To find an alternative route, do the following:

1. Plan a route as usual.
2. On the [map view](#), select the route itself.
3. Select the pop-up menu button to open the menu.
4. Select **Alternative Route** and then select **Find alternative**.

Up to three alternative routes are shown on the map view. Each alternative route shows the difference in travel time in a balloon.

5. Select your chosen route by tapping on the time balloon. Guidance to your destination begins. As soon as you start driving, the [guidance view](#) is shown automatically.

Note: There are two other ways of finding alternative routes:

1. Select **Current Route** in the Main Menu, followed by **Find Alternative**.
2. If your device has voice control, say "Find alternative".

Planning a route in advance

You can plan a route in advance before you drive it. You can save the route as part of your [My Routes](#) list.

To plan a route in advance, do the following:

1. Select the Main Menu button to open the Main Menu.

2. Select **Search**.

The search screen opens with the keyboard showing.

Tip: If you don't want to use search to choose your starting point and destination, go to the map view and press and hold to select a location.

3. Use the keyboard to enter the name of the location you want to use as a starting point.
4. Select an address or POI suggestion.
5. Select **Show on Map**.
6. Select the pop-up menu button.

A pop-up menu shows a list of options.

7. Select **Use as Starting Point**.
8. Repeat the search steps to choose your destination, and then select **Drive/Ride** in the pop-up menu.

Your route is planned using your chosen starting point and destination. The estimated journey time is shown at the top of the route bar.

Tip: Stops, POIs, Places and the destination can all be selected as starting points using their pop-up menus.

Tip: You can [save the route in My Routes](#).

9. To drive to the starting point, select **Drive/Ride** at the top of the screen.
The starting point of the route is converted to your first stop and then the route is planned. Guidance to your destination begins from your current location. As soon as you start driving, the guidance view is shown automatically.

Changing the starting point to be your current location

1. Select the starting point of the route in the map view.
2. Select the pop-up menu button.

A pop-up menu shows a list of options.

3. Select **Remove Starting Point**.

Your route is replanned with your current location as the starting point. The original starting point is removed from your route.

Changing the starting point into a stop

1. Select the starting point on the route in the map view.
2. Select the pop-up menu button.

A pop-up menu shows a list of options.

3. Select **Change to a Stop**.

Your route is replanned with the starting point changed into a stop.

Finding a car park

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To find a car park, do the following:

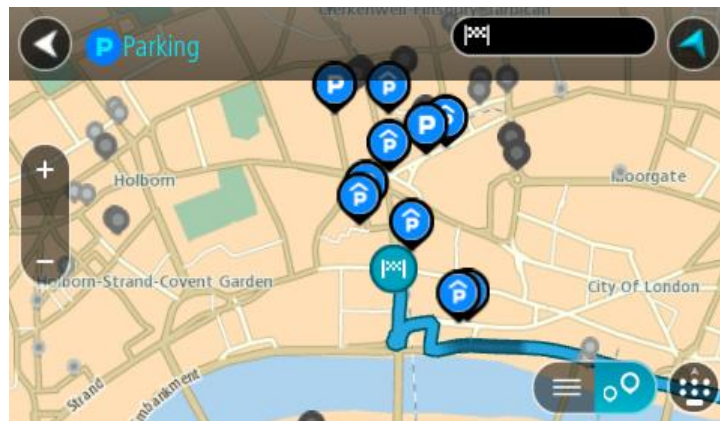

1. Select the Main Menu button to open the Main Menu.

2. Select **Parking**.

The map opens showing the locations of car parks.

If a route is planned, the map shows car parks near your destination. If a route isn't planned, the map shows car parks near your current location.

You can change the screen to show a list of car parks by pressing this button:

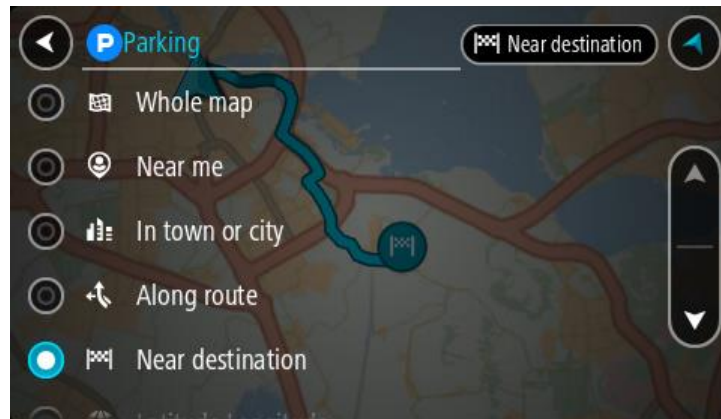

You can select a car park from the list to locate it on the map.

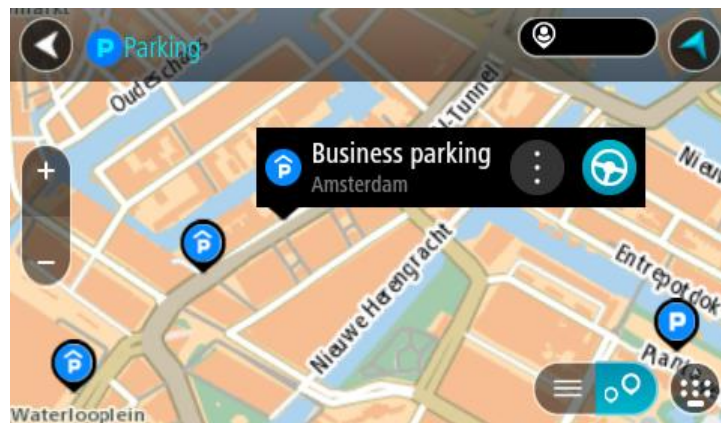

Tip: You can scroll down the list of results using the scroll bar on the right side of the screen.

If you want to change how the search is done, select the button to the right of the search box. You can then change where the search is carried out, for example, to search near you or the whole map.

3. Select a car park from the map or the list.
A pop-up menu opens on the map showing the name of the car park.

4. Select **Drive/Ride** depending on which device you are using.
A route is planned and then guidance to your destination begins. As soon as you start driving, the guidance view is shown automatically.

Tip: You can add a car park as a stop on your route by using the pop-up menu.

Finding a gas station

Important: In the interest of safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To find a gas station, do the following:

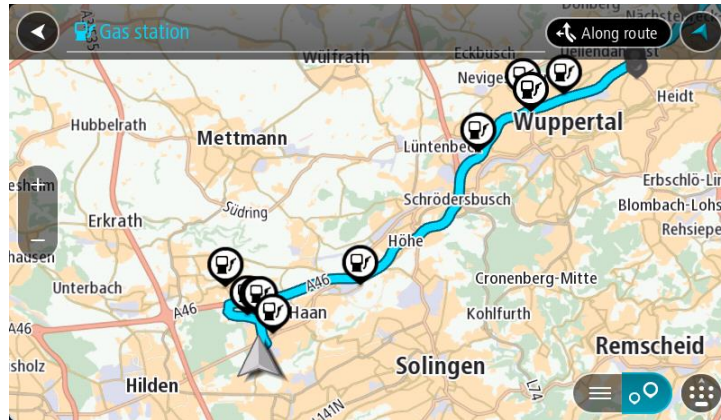

1. Select the Main Menu button to open the Main Menu.

2. Select Gas Station.

The map opens showing the locations of gas stations.

If a route is planned, the map shows gas stations along your route. If a route isn't planned, the map shows gas stations near your current location.

You can change the screen to show a list of gas stations by pressing this button:

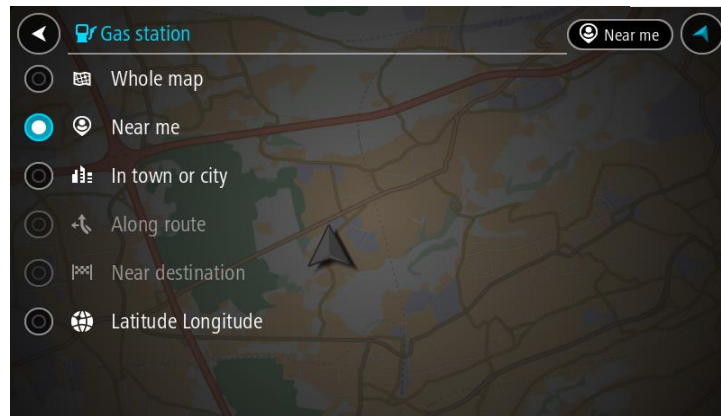

You can select a gas station from the list to locate it on the map.

Tip: You can scroll down the list of results using the scroll bar on the right side of the screen.

If you want to change how the [search](#) is done, select the button to the right of the search box. You can then change where the search is carried out, for example, to search near you or the whole map.

3. Select a gas station from the map or the list.
A pop-up menu opens on the map showing the name of the gas station.

4. Select **Drive/Ride** depending on which device you are using.
A route is planned and then guidance to your destination begins. As soon as you start driving, the guidance view is shown automatically.

Tip: You can add a gas station as a stop on your route by using the pop-up menu. A gas station that is a stop on your route has a blue icon.

Changing your route

The Current Route Menu

When you have planned a route, select the **Current Route** button in the Main Menu to open the Current Route Menu.

The following buttons are available in the menu:

Clear Route

Select this button to clear the currently planned route.
The Current Route Menu closes and you return to the [map view](#).

Skip Next Stop

Select this button to [skip the next stop](#) on your route.

Find Alternative

You see this button when you have planned a route. Select this button to show up to three alternative routes on the [map view](#).

Avoid Blocked Road

Select this button to [avoid an unexpected obstacle](#) that is blocking the road on your route.

Avoid Part of Route

Select this button to [avoid part of a route](#).

Avoid Toll Roads and More

Select this button to avoid some [types of route features](#) that are on your currently planned route. These include ferries, toll roads and unpaved roads.

Show Instructions

Select this button to see a list of turn-by-turn text instructions for your planned route.

The instructions include the following:

- The street name.
 - Up to two road numbers shown in road shields whenever available.
 - An instruction arrow.
-

-
- An instruction description.
 - The distance between two consecutive instructions.
 - Exit number.

Tip: Select an instruction to see a preview of that section of the route in the map view.

You can also select the instruction panel in [the guidance view](#) to see turn-by-turn text instructions.

Add Stop to Route

Select this button to add a stop to your currently planned route. You can also [add a stop to your route directly from the map](#).

Add to My Routes

If you plan a new route that has not already been saved, you see this button. Select this button to save this route as part of your [My Routes](#) list.

Save Changes to Route

If you make a change to a [My Route](#), you see this button. Select this button to save the changes.

Change Route Type

Select this button to change the [type of route](#) used to plan your route. Your route will be recalculated using the new route type.

Reorder Stops

Select this button to see the lists of stops for your current route. You can then [change the order of the stops on your route](#).

For a route without stops, you can also select this button to reverse your route.

Drive to Route

Select this button to plan a route from your current location to the starting point of a [My Route](#). The starting point is converted to a stop.

Play Route Preview

Select this button to watch a preview of your planned route.

Stop Route Preview

Select this button to stop the preview of your planned route.

Avoiding a blocked road

If there is a blocked road on your route you can change your route to avoid it.

1. In the [guidance view](#), select the current location symbol or the speed panel.

Tip: The speed panel is only shown when you have started driving on your route.

2. Select **Avoid Blocked Road**.

A new route is found that avoids the blocked road. You may get shown up to two alternatives depending on the road network between you and your destination.

The new route is shown on the map view with the difference in travel time in a balloon.

Note: It may not be possible to find an alternative route around the blocked road if none exists.

3. Select the new route by selecting the time balloon.

Guidance to your destination resumes avoiding the blocked road. As soon as you start driving, the guidance view is shown automatically.

Avoiding part of a route

If part of a road is blocked or you wish to avoid part of a route, you can select a specific section of a route to avoid.

1. Select the Main Menu button to open the Main Menu.

2. Select **Current Route**.

3. Select **Avoid Part of Route**.

A screen opens showing a list of the sections that comprise your current route.

4. Select the section of the route that you want to avoid.

A preview shows you the section you have chosen on the map.

5. Select **Avoid**.

A new route is found that avoids your chosen route section. The new route is shown on the map view.

Note: It may not be possible to find an alternative route around the route section if none exists.

Guidance to your destination resumes avoiding your chosen route section. As soon as you start driving, the guidance view is shown automatically.

Types of route

Select **Change Route Type** to change the type of route planned to your current destination. Your route is recalculated using the new route type.

You can select the following types of route:

- **Fastest route** - the fastest route to your destination. Your route is constantly checked taking into account the traffic conditions.
- **Shortest route** - the shortest route to your destination. This may take much longer than the fastest route.
- **Most eco-friendly route** - the most fuel-efficient route.
- **Avoid interstate highways** - this type of route avoids all interstate highways.

You can set the default route type in the [Settings](#) Menu.

Route features

You can choose to avoid some features that are on your currently planned route. You can avoid the following route features:

- **Toll Roads**
- **Ferries and car shuttle trains**
- **Carpool Lanes**
- **Unpaved Roads**

Note: Carpool lanes are sometimes known as High Occupancy Vehicle Lanes (HOV lanes) and are not present in every country. To travel on these lanes, you may need to have more than one person in the car, for example, or the car may need to use environmentally-friendly fuel.

If you choose to avoid a route feature, a new route is planned.

In Route Planning in the Settings Menu, you can set how each route feature is handled when a new route is planned.

Adding a stop to your route from the current route menu

1. In the Main Menu, select **Current Route**.
2. Select **Add Stop to Route**.
The map view is shown.
3. To select a stop, do one of the following steps:
 - Zoom in on the map, then press and hold to select a location. In the pop-up menu, select **Add to Current Route**.

- Select **Search** and search for a location. When you have found a location, select the **Add Stop to Route** button.

Your route is recalculated to include your stop.

Adding a stop to your route using the map

1. Press the [switch view button](#) to show the map.
Your complete route is shown on the map.
2. Zoom in on the map, then press and hold to select a location.
3. Select the pop-up menu button.
4. Select **Use in Route**.

5. Select **Add to Current Route**.

Your route is recalculated to include your stop.

Deleting a stop from your route

1. Press the [switch view button](#) to show the map.
Your complete route is shown on the map.
2. In the [route bar](#), press the stop you want to delete.
The map zooms in to the stop and shows a pop-up menu.

Tip: If you select the wrong stop press the back button to return to the map.

3. Select **Delete This Stop**.
The stop is deleted and your route is recalculated.

Skipping the next stop on your route

Tip: To make it easy to quickly skip a stop, [move the button](#) **Skip Next Stop** to the first screen of the Main Menu.

1. In the Main Menu, select **Current Route**.
2. Select **Skip Next Stop**.
The map view is shown. The next stop on your route is deleted and your route is recalculated.

Reordering stops on a route

1. In the Main Menu, select **Current Route**.
2. Select **Reorder Stops**.
The map view is shown with the route cleared. The starting point, destination and all the stops are shown.
3. Select the stops one by one in the order you wish to drive them.
The symbols change to a flag as you select each stop. The last stop you select becomes your destination.
Your route is recalculated with the stops in the changed order.

My Routes

About My Routes

My Routes provides an easy way to save and retrieve routes and tracks.

You may want to use My Routes in one or more of the following situations:

- **While working** - Your job involves driving several routes with multiple stops on a daily basis. Your routes can change and you need to be flexible and be able to change the order of your stops or change the planned route.
- **While on holiday** - You are going on holiday and want to plan and save a route. Your route includes scenic roads, stops at various hotels, and other places like tourist attractions.
- **While touring** - You want to follow a tour you have downloaded from the Internet, or drive a route another user has shared with you.
- **While commuting to work** - You want to add one or two regular stops between home and work. Your route back home in the evening is the reverse of your route to work in the morning.

Routes can be created and saved on your TomTom Navigation App.

About routes and tracks

The term "route" includes two types of route from one place to another:

- **Routes** have a starting point and a destination, and perhaps some stops. Your device calculates your preferred type of route between all these points, for example, the fastest or most economical, and uses Traffic. You can edit a route by, for example, adding stops or moving the starting point. Routes can be imported but cannot be exported from your device.

- **Tracks** also have a starting point and a destination, but have no stops. Your route follows the track as closely as possible, ignoring your preferred type of route and traffic conditions, and any traffic on the route. Tracks can be imported and exported from your device.

Tip: Tracks have a dotted arrow!

Important: Routes and tracks cannot be stored on the same memory card as maps because different memory card formatting is used.

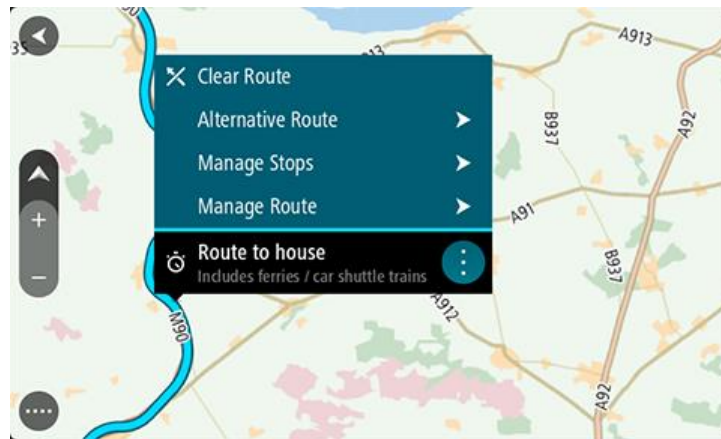

Saving a route

1. Plan a route using the steps described in [Planning a route](#).

Tip: If you cannot see your planned route on the map view, select the back button to show your route.

2. Select the route.

3. Select the pop-up menu button to open the menu.

4. Select **Manage Route**, then **Add to My Routes**.
The name of the route is shown in the edit screen.
5. Edit the name of the route so that you can easily recognise it.
6. Save your route in the My Routes list.

Tip: You can also save a route using the **Add to My Routes** button in the Current Route menu.

Navigating using a saved route

To navigate using a previously saved route, do the following:

1. In the Main Menu, select **My Routes**.
2. Select a route from your list.
The route is shown on the map view.

3. To navigate to the start of the saved route, select **Drive/Ride** depending on which device you are using.

The starting point of the saved route is converted to your first stop and then the route is planned. Guidance to your destination begins from your current location. As soon as you start driving, the guidance view is shown automatically.

Tip: There are two other ways to navigate using a saved route: Select the starting point of the route. When the pop-up menu opens, select **Change to a Stop**. Alternatively, select **Drive to Route** or **Ride to Route** in the Current Route menu.

Adding a stop to a saved route using the map

Note: You can also press and hold a location on the map and select **Add to Current Route** from the pop-up menu.

1. Press the [switch view button](#) to show the map.
Your complete route is shown on the map.
2. Select the route.
3. Select the pop-menu button to open the menu.

4. Select **Manage Stops**.
5. Select **Add Stop to Route**.
6. Select your new stop on the map.

Tip: If you know the name of your new stop, you can use **Search** to select your stop instead of using the map.

7. Select the **Add Stop** button to add this location as a stop.

Your route is recalculated to include your stop.

Tip: To update the saved route in your My Routes list with the changes, select the route on the map then select **Save Changes to Route** in the pop-up menu.

Deleting a route or a track from My Routes

1. In the Main Menu, select **My Routes**.
2. Select **Edit List**.
3. Select the routes you want to delete.
4. Select **Delete**.

Safety cameras

About safety cameras

Important: The Safety cameras service is only available in Australia.

The Safety cameras service warns you about the following camera locations:

- Fixed cameras.
- Speed traps.
- Speed trap hotspots.
- Average speed zones.
- Speed enforcement zones.
- Red light camera locations.
- Traffic restriction cameras.

The Safety cameras service also warns you about the following safety hazards:

- Accident hotspots.

Crossing into another area or country

When you drive into an area or country that does not permit safety camera warnings, your TomTom Navigation App switches the safety cameras service off. You will not receive safety camera warnings in those areas or countries.

Some areas or countries permit limited safety camera warnings, for example only warnings for fixed cameras, or warnings for risk zones. Your TomTom Navigation App automatically switches to give limited warnings when you cross into those areas or countries.

Safety camera warnings

Important: The Safety cameras service is only available in Australia.

Safety camera warning sounds are played for the most common types of safety camera.

Warnings are given as you approach a safety camera. You are warned in several ways:

- A symbol is shown in the route bar and on your route on the map.
- Your distance to the safety camera is shown in the route bar.
- You hear a warning sound as you get near the camera.
- While you are approaching a camera or driving in an average speed check area, your speed is monitored. If you drive more than 5 km/h or 3 mph over the speed limit the route bar turns red. If you drive less than 5 km/h or 3 mph over the speed limit the route bar turns orange.

Tip: In the [map view](#) or [guidance view](#), you can select a safety camera symbol in the route bar to see the type of camera, the maximum speed and also the length of an average speed check area. In the map view, you can also select a safety camera that is shown on your route.

Symbol shown on map	Symbol shown in route bar	Description
		Fixed camera - this type of camera checks the speed of passing vehicles and is fixed in one place.
		Average speed zones - these types of cameras measure your average speed between two points. You are warned at the start and end of the average speed check area. While you are driving in an average speed check area, your average speed is shown, instead of your current speed. The distance to the end of the area is shown in the route bar.
		Speed enforcement zones - these zones can contain multiple safety cameras. You are warned at the start and end of a speed enforcement zone. While you are driving in a speed enforcement zone, your current speed is shown, and a visual warning is shown in the route bar.
		Red light camera - this type of camera checks for vehicles breaking traffic rules at traffic lights. There are two types of traffic light camera - those which check if you drive through a red light and those which check for driving through a red light together with speeding.
		Traffic restriction - this type of warning warns you about restricted roads.
		Accident hotspots - this type of warning is given for a place where road traffic accidents have historically been concentrated. You are warned at the start and end of the accident hotspots. While you are driving in an accident hotspots, your current speed is shown and a visual warning is shown in the route bar.

Changing the way you are warned

Important: The Safety cameras service is only available in Australia.

To change the way you are warned about safety cameras, select the **Sounds and Warnings** button in the Settings menu.

You can then set how you want to be warned for the different types of cameras and safety hazards. You can change settings for whether you want to be warned, never warned or warned only if you are speeding.

For example, to change how you are warned when you approach a fixed camera, do the following:

1. Select **Sounds & Warnings** in the **Settings** Menu.
2. Select **Safety Cameras warnings**.
3. Select **Fixed cameras**.
4. Select one of the following warning options:
 - **Always**.
 - **Only when speeding**.
 - **Never**.
5. Select the back button.

Tip: To turn off all audible warnings, select **Settings**, followed by **Sounds & Warnings** and then switch off **Safety camera warnings**.

My Places

About My Places

My Places provides an easy way to select a location without the need to search for the location each time. You can use My Places to create a collection of useful or favourite addresses.

Tip: The terms "favourite" and "place" mean the same thing - favourites are places that you go to often.

The following items are always in My Places:

- **Home** - Your home location can be your home address or somewhere you often visit. This feature provides an easy way to navigate there.
- **Work** - Your work location can be your workplace address or somewhere you visit often. This feature provides an easy way to navigate there.
- **Recent destinations** - Select this button to select your destination from a list of locations you have recently used as destinations. These also include your stops.
- **Marked locations** - You can mark a location and temporarily add it to My Places.

You can add a location to My Places directly in [My Places](#), by [selecting a location](#) from the map, by [searching for a location](#) or by [marking a location](#).

Your home location, work location, marked locations and the locations that you have added appear in a list in My Places and are shown with a marker on the [map](#).

Setting your home or work location

You can set your home or work locations in the following ways:

Setting your home or work location using My Places

1. In the Main Menu, select **My Places**.
2. Select **Add Home** or **Add Work**.
3. To select a location for home or work, do one of the following:
 - Zoom in on the map at the location you want to select. Press and hold to select the location, then select **Set**.
 - Select the Search button and search for a location. Select a location to set as home or work, then select **Set**.

Setting your home or work location using the map

1. In the [Map View](#), move the map and zoom in until you can see your home or work location.
2. Press and hold to select the location.

A pop-up menu shows the nearest address.

1. Open the pop-up menu and select **Add to My Places**.
2. In the name bar, enter the name "Home" or "Work".

Note: "Home" must have a capital letter H and "Work" must have a capital letter W.

3. Save the location.
Your home or work location is shown on the map.

Changing your home location

You can change your home location in the following ways.

Changing your home location using My Places

1. In the Main Menu, select **My Places**.
2. Select **Home**.
Your home location is shown on the map, with a pop-up menu.

3. Select **Edit Location**.
4. To select a new home location, do one of the following:
 - Zoom in on the map at the location you want to select. Press and hold to select the location, then select the home location symbol.
 - Select the **Search** button and search for a location. Select a location to set as home. Select **Set home location**.

Changing your home location using the map

1. In the [Map View](#), move the map and zoom in until you can see your new home location.
2. Select the location by pressing and holding the screen for about one second.

A pop-up menu shows the nearest address.

1. Open the pop-up menu and select **Add to My Places**.
2. In the name bar, enter the name "Home".

Note: "Home" must have a capital letter H.

3. Select **Add**.
Your home location is changed to the new location.

Adding a location from My Places

1. In the Main Menu, select **My Places**.
2. Select **Add a new place**.
3. To select a location, do one of the following:
 - Zoom in on the map at the location you want to select. Press and hold to select the location, then select the add location symbol.
 - Search for a location. Select **Show on Map**, then select the add location symbol.

The name of the location appears in the edit screen.

4. Edit the name of the location so you can easily recognise it.
5. Select **Done** to save your location in the My Places list.

Add a location to My Places from the map

1. Move the map and zoom in until you can see the destination that you want to navigate to.
2. Press and hold to select the location.

3. Select the pop-up menu button.

4. Select **Add to My Places**.
The name of the location is shown in the edit screen.
5. Edit the name of the location so you can easily recognise it.
6. Select **Done** to save your location in the My Places list.
The location you added is shown with a marker on the map.

Adding a location to My Places using search

1. In the Main Menu, select **Search**.
2. Search for a location.
3. Select the location then select **Show on map**.
4. When the map view shows the location, select the pop-up menu button.

5. Select **Add to My Places**.

The name of the location appears in the edit screen.

6. Edit the name of the location so you can easily recognise it.
7. Select **Done** to save your location in the My Places list.

Adding a location to My Places by marking

To mark a location and temporarily add it to My Places, do the following:

1. Make sure that your current location is the location you want to mark.
2. Select the current location symbol or the speed panel in the [guidance view](#) to open the [quick menu](#).
3. Select **Mark Location**.
4. Once marked, the location is saved in My Places in the Marked Locations list.

If you want to permanently save a marked location, add it My Places by doing the following:

1. In the Main Menu, select **My Places**.
2. Select **Marked Locations** and choose your location from the list.
The marked location is shown on the map.
3. Select **Add to My Places** from the pop-up menu.
The name of the location appears in the edit screen.
4. Edit the name of the location so you can easily recognise it.
5. Select **Add**.

Deleting a recent destination from My Places

1. In the Main Menu, select **My Places**.
2. Select **Recent Destinations**.
3. Select **Edit List**.
4. Select the destinations you want to delete.
5. Select **Delete**.

Deleting a location from My Places

1. In the Main Menu, select **My Places**.
2. Select **Edit List**.
3. Select the locations you want to delete.
4. Select **Delete**.

Settings

Appearance

Select **Settings** in the Main Menu, then select **Appearance**.

On this screen, you can change these settings:

- **Display**
Select [Display](#) to change the appearance of the display.
- **Route bar**
Select Route bar to change the information you see in the route bar.
- **Guidance view**
Select [Guidance view](#) to change the information you see in the guidance view.
- **Automatic zoom**
Select [Automatic Zoom](#) to change how you view a junction as you drive.
- **Automatic map view switching**
By default, automatic changing of views is on. This means, for example, that your TomTom Navigation App shows the map view when an alternative route is being suggested, along with several other sets of circumstances. Also, for example, that your TomTom Navigation App shows the guidance view when you start driving and you start to accelerate. Select this setting if you want to turn off automatic changing between guidance view and map view.
- **Show previews of interstate highway exits**
Select this setting to control the full screen preview when you approach interstate highway exits.

Display

Select **Settings** in the Main Menu, then select **Appearance**.

Theme color

Select **Theme color** to change the accent color used in the menus, buttons and icons.

Switch to night colors when dark

Automatically change day/night colors.

Route Bar

Select **Settings** in the Main Menu, then select **Appearance**.

Select [Arrival information](#) to change the arrival information you see in the route bar.

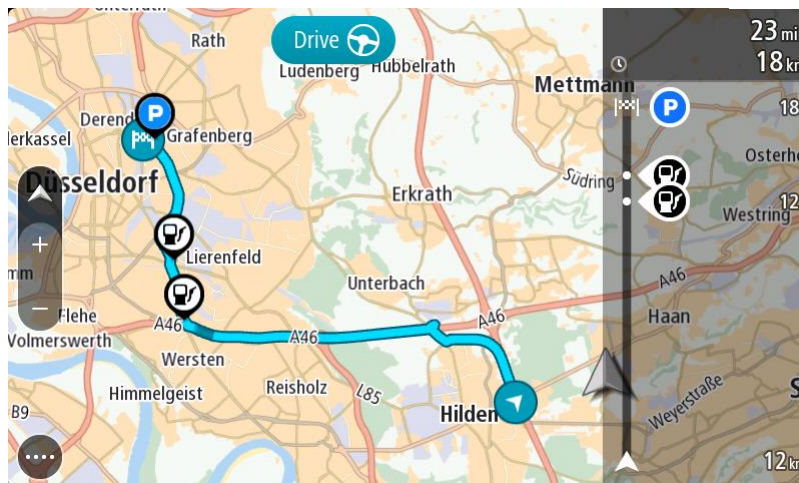

Select [Route information](#) to change the route information you see on the route bar.

Show wide route bar if possible

The wide route bar is not shown by default. You can select this setting to switch on the wide route bar in the [guidance view](#).

Note: The wide route bar can only be shown if the screen is wide enough.

When the wide route bar is shown, you see more information about your route.

Arrival information

Select **Arrival information** to change the following settings:

- **Show remaining distance**
Select this setting to show the remaining distance left to travel in the arrival information panel during navigation.
- **Show remaining time**
Select this setting to show the remaining time left to travel in the arrival information panel during navigation.
- **Switch between distance and time automatically**
Select this setting to control the automatic switching between remaining distance and remaining time in the arrival information panel.
- **Show arrival information for**
Use this setting to control whether you want to see information about the destination or the next stop in the arrival information panel.

Tip: To find out where the different panels are in the guidance view or map view, see [What's on the screen](#).

Route Information

You can choose to see any of the following in the route bar:

- **Parking**
Select this setting to see car parks and parking.
- **Gas stations**
Select this setting to see gas stations on your route.
- **Stops**
Select this setting to see stops on your route.
- **Rest areas**
Select this setting to see rest areas on your route.

Guidance view

Select **Settings** in the Main Menu, then select **Appearance**.

- **Show current street name**
This setting displays name of the street you are driving along.
- **Guidance view style**
Select this setting to choose from 3D or 2D versions of the guidance view. Both the 2D and 3D guidance views move in your direction of travel.

Automatic Zoom

Select **Settings** in the Main Menu, then select **Appearance**.

Select **Automatic zoom** to change settings for the automatic zoom in Guidance view when you approach a turn or a junction. Zooming in can make the turn or junction easier to drive.

- **Zoom in to next turn**
All the turns and junctions on your route are shown zoomed in to the maximum level.
- **Based on road type**
The turns and junctions on your route are shown zoomed in to the standard level for the type of road you are on.
- **None**
None of the turns and junctions on your route are shown zoomed in.

Voices

Select **Settings** in the Main Menu, then select **Voices**.

Choosing a voice

Select **Choose a voice** to change the voice that gives spoken directions and other route instructions. A wide range of voices are available. There are recorded voices which have been recorded by actors.

Instruction settings

- **Read early instructions out loud**

For example, if you switch on this setting, you could hear early instructions such as "After 2 km take the exit right" or "Ahead, turn left".

Maps

Select **Settings** in the Main Menu, then select **Maps**.

Changing the map

Select **Change map** to change the map that you are using.

You can choose from maps stored either in internal memory or memory cards if your TomTom Navigation App has a memory card slot.

Important: Routes and tracks cannot be stored on the same memory card as maps because different memory card formatting is used.

Note: Although you can store more than one map on your TomTom Navigation App, you can only use one map at a time for planning and navigation.

Route Planning

Select **Settings** in the Main Menu, then select **Route Planning**.

When a faster route is available

If a faster route found while you are driving, TomTom HD Traffic can replan your journey to use the faster route. Select from the following options:

- **Always take the fastest route**
- **Ask me so I can choose**
- **Don't ask me**

Always plan this type of route

The types of route you can choose from are as follows:

- **Fastest route** - the route which takes the least time.
- **Shortest route** - the shortest distance between the locations you set. This may not be the quickest route, especially if the shortest route is through a town or city.
- **Most eco-friendly route** - the most fuel-efficient route for your journey.
- **Avoid interstate highways** - this type of route avoids all interstate highways.

Avoid on every route

You can choose to avoid ferries and car shuttle trains, toll roads, carpool lanes, and unpaved roads. Set how your TomTom Navigation App should manage each of these road features when the device calculates a route.

Carpool lanes are sometimes known as High Occupancy Vehicle Lanes (HOV) and are not present in every country. To travel on these lanes, you may need to have more than one person in the car, for example, or the car may need to use environmentally-friendly fuel.

Sounds and Warnings

Select **Settings** in the Main Menu, then select **Sounds & Warnings**.

On this screen, you can change sound and warning settings.

Warning type

Warning type

You can choose the type of warnings you want to hear when you are driving:

- **Warning Sounds**
Hear only warning sounds.
- **None**
No warning sounds are given.

Safety camera Warnings

Important: The Safety cameras service is only available in Australia.

Select **Settings** in the Main Menu, then select **Sounds & Warnings**.

Select **Safety camera warnings**. You can then set how you want to be warned for the different types of cameras. You can set whether you want to be warned, never warned or warned only if you are speeding.

Safety Warnings

Select **Settings** in the Main Menu, then select **Sounds & Warnings**.

Select **Safety warnings**. You can then set how you want to be warned for the different types of danger zones and safety hazards. You can set whether you want to be warned, never warned or warned only if you are speeding.

- **Danger zones**

A danger zone is a zone specified by French law. This type of warning is given in France at the start and end of the danger zone.

- **Accident hotspots**

This type of warning is given for a place where road traffic accidents have historically been concentrated.

- **Risk zones**

A risk zone is a temporary danger zone reported by users. This type of warning is given in France at the start and end of the risk zone.

- **When speeding**

This warning is given as soon as you exceed the speed limit by more than 5 km/h or 3 mph. When you are speeding, the speed panel also turns red in the guidance view.

Language and Units

Select **Settings** in the Main Menu, then select **Units**.

Select this setting to choose the units used on your device for features such as route planning. If you want the units to be set by the GPS, select **Automatic**.

System

Select **Settings** in the Main Menu, then select **System**.

Select this setting to choose the language and the time zone.

Getting Help

Help

Select **Help** from the Main Menu.

On this screen, you can see the following information and change one setting:

- **Map version**
- **Device serial number and legal information**
- **Reset**

Select this setting to delete all your saved places and settings and restore the standard factory settings to your TomTom Navigation App. This includes the language, voice settings, warning settings and theme.

This is not a software update and will not affect the version of the software application installed on your TomTom Navigation App.

You can get further help by going to [tomtom.com/support](https://www.tomtom.com/support).

Addendum

Important Safety Notices and Warnings

Global Positioning System (GPS) and Global Navigation Satellite System (GLONASS)

The Global Positioning System (GPS) and Global Navigation Satellite System (GLONASS) systems are satellite-based systems that provide location and timing information around the globe. GPS is operated and controlled by the Government of the United States of America, which is solely responsible for its availability and accuracy. GLONASS is operated and controlled by the Government of Russia, which is solely responsible for its availability and accuracy. Changes in GPS or GLONASS availability and accuracy, or in environmental conditions, may impact the operation of this device. TomTom disclaims any liability for the availability and accuracy of GPS or GLONASS.

Safety messages

Use with care

It is your responsibility to use best judgment, due care and attention when using this navigation device. Don't allow interaction with this device to distract you while driving. Minimise the time spent looking at the device screen while driving. You are responsible for observing laws that limit or prohibit the use of mobile phones or other electronic devices, for example, the requirement to use hands-free options for making calls when driving. Always obey applicable laws and road signs especially those relating to your vehicle's dimensions, weight and payload type. TomTom does not guarantee the error-free operation of this navigation device nor the accuracy of the route suggestions provided and shall not be liable for penalties arising from your failure to comply with applicable laws and regulations.

Safety messages

Please read and take note of the following important safety advice:

- Check your tyre pressures regularly.
- Service your vehicle regularly.
- Medication can affect your riding or driving ability.
- Always use seat belts if available.
- Don't drink and drive.
- Most accidents happen less than 5 km / 3 miles from home.
- Obey the rules of the road.
- Always use your turn indicators.
- Every 2 hours, take a break for at least 10 minutes.
- Keep your seat belts on.
- Keep a safe distance from the vehicle in front.
